We Are Music: An Existential Journey Toward

Infinity John Stephen Sharpley, 2024-02-15 What is music Modern society has come to view music largely as entertainment and commodity In response We Are Music An Existential Journey Toward Infinity provides the reader with a holistic starting point Music has unlimited potential to transform and enlighten and is only impeded when bound by materialism physicalism and reductionism We Are Music is an attempt to bring music back to the core of humanity as an agent of positive empowerment self actualization and beyond Embracing interconnectivity music is more deeply experienced alongside the arts science social sciences math philosophy history and above all spirituality An endless spiral self perception and identity can be vastly expanded if not questioned and transcended Music is an infinite field and any attempt to define and describe it is problematically finite and consequently limited Herein lies the impossibility of the book which both excites and disturbs the paradox of being and not being A roadmap for music lovers toward self realization We Are Music is for those who desire to delve deeper into the power and illusion of self through music

The Mind of Consciousness Ray Morose, 2011

The Mind of Consciousness The Mind of Consciousness is a book unfolding a new way with new process methods to evaluate your existence It is an experiential work written in textbook format that analytically delineates how and why consciousness and mind interface and function exposing the inter connective dependency of non biological consciousness and the biologically created mind Knowing how that interconnectivity interrelates provides avenues of exploration that reveal the fundamental nature of existence unveiling an innate purpose and direction embedded within consciousness This book works through all the major questions of existence using reproducible and experiential logic allowing everyone to experience the results of that exploration Throughout your life you have two realities at war with one another the primary I am reality formed from non biological consciousness and the secondary I am this or that reality formed by the biological mind You may not be aware of or even appreciate the internal conflict these two inter connective and inter dependent realities create However you experience the resultant turmoil and confusion their subliminal battles establish by not having an experiential appreciation of how those realities are formed function and potentially control your life The text delineates causation for those ongoing internal battles and outlines processes to help overcome the sense of frustration isolation and discord they generate This experiential method of examination creates empirical processes that afford you the opportunity to make an informed choice rather than a

conditioned reaction providing a more secure productive directional and enjoyable life This book takes you into the core of your being turning it inside out exposing who and what you are by revealing a self created shadow world controlling your life without you being aware that control exists

Music, Mind, and Brain Manfred Clynes,2013-06-29 There is much music in our lives yet we know little about its function Music is one of man s most remarkable inventions though possibly it may not be his invention at all like his capacity for language his capacity for music may be a naturally evolved biologic function All cultures and societies have music Music differs from the sounds of speech and from other sounds but only now do we find ourselves at the threshold of being able to find out how our brain processes musical sounds differently from other sounds We are going through an exciting time when these questions and the question of how music moves us are being seriously investigated for the first time from the perspective of the co ordinated functioning of the organism the perspective of brain function motor function as well as perception and experience There is so much we do not yet know But the roads to that knowledge are being opened and the coming years are likely to see much progress towards providing answers and raising new questions These questions are different from those music theorists have asked themselves they deal not with the structure of a musical score although that knowledge is important and necessary but with music in the flesh music not outside of man to be looked at from written symbols but music man as a living entity or system
