Oil And Gas A Nontechnical Guide:

The Oil & Gas Industry Joseph Hilyard, 2012 Joseph Hilyard's timely new book provides a broad perspective on the oil and gas industry with primary attention to the United States. It takes the reader on a tour of the operations used to find and evaluate resources and then to produce, store and deliver oil and gas. The book's main focus is primarily on the equipment and processes used in exploring new resources, evaluating promising formations, drilling wells, managing oil and gas production, converting oil and gas into products and transporting oil and gas. Separate chapters address the evolution and current structure of the petroleum industry, oil and gas trading and challenges likely to face the oil and gas industry in coming years. Beyond Oil and Gas George A. Olah, Alain Goeppert, G. K. Surya Prakash, 2011-08-24
The world is currently consuming about 85 million barrels of oil a day and about two thirds as much natural gas equivalent, both derived from non-renewable natural sources. In the foreseeable future, our energy needs will come from any available alternate source. Methanol is one such viable alternative and also offers a convenient solution for efficient energy storage on a large scale. In this updated and enlarged edition, renowned chemists discuss in a clear and readily accessible manner the pros and cons of humankind's current main energy sources while providing new ways to overcome obstacles. Following an introduction, the authors look at the interrelationship of fuels and energy and at the extent of our non-renewable fossil fuels. They also discuss

the hydrogen economy and its significant shortcomings The main focus is on the conversion of CO₂ from industrial as well as natural sources into liquid methanol and related DME a diesel fuel substitute that can replace LNG and LPG The book is rounded off with an optimistic look at future possibilities A forward looking and inspiring work that vividly illustrates potential solutions to our energy and environmental problems **Oil, gas and other energ...** Albert Legault,
