### **Software Quality: The Complexity and Challenges of Software Engineering and Software Quality in the Cloud**

Dietmar Winkler, Stefan Biffl, Johannes Bergsmann, 2019-01-07 This book constitutes the refereed proceedings of the 11th Software Quality Days Conference SWQD 2019 held in Vienna Austria in January 2019. The Software Quality Days SWQD conference started in 2009 and has grown to the biggest conference on software quality in Europe with a strong community. The program of the SWQD conference is designed to encompass a stimulating mixture of practical presentations and new research topics in scientific presentations. The guiding conference topic of the SWQD 2019 is The Complexity and Challenges of Software Engineering and Software Quality in the Cloud. The 5 full papers and 3 short papers presented in this volume were carefully reviewed and selected from 17 submissions. The volume also contains 2 invited talks. The contributions were organized in topical sections named multi disciplinary systems and software engineering, software quality and process improvement, software testing, knowledge engineering and machine learning, source code analysis and software maintenance.

*Third International Congress on Information and Communication Technology* Xin-She Yang, Simon Sherratt, Nilanjan Dey, Amit Joshi, 2018-09-28 The book includes selected high quality research papers presented at the Third International Congress on Information and Communication Technology held at Brunel University London on February 27-28 2018. It discusses emerging topics pertaining to information and communication technology, ICT for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IoT) and e-mining. Written by experts and researchers working on ICT, the book is suitable for new researchers involved in advanced studies.

**The Wide World of Coding** Jennifer Connor-Smith, 2020-04-07 The best part about coding is that anyone with a computer can learn how to do it. From education to healthcare to entertainment, software touches almost every aspect of twenty-first century life. Take a high-level perspective on the types of people who create that software, including many jobs that do not involve writing code at all. Learn about the software development cycle and the huge variety of skills developers draw on, including psychology, mathematics, and art, to create amazing apps and programs. Explore why diversity is needed to prevent bias in design. Learn about the different coding languages and what they are used for, how developers choose a language and tools that simplify coding. Jennifer Connor Smith breaks down stereotypes about coding as a career that is open only to technology obsessed gamers, revealing ways people use software to improve medical care, nurture dementia patients, promote social justice, and more. Hands-on activities show you how easy it is to learn to think like a coder. The next generation of coders will require diverse teams, creativity, and ethical codes of conduct to create the best and most successful software. Will you be one of them?
