Mind Collection Studies Eighteenth Century Material:

Irish Materialisms Colleen Taylor, 2024 Irish Materialisms The Nonhuman and the Making of Colonial Ireland 1690 1830 is the first book to apply recent trends in new materialist criticism to Ireland It radically shifts familiar colonial stereotypes of the feminized racialized cottier according to the Irish peasantry s subversive entanglement with nonhuman materiality Each of the chapters engages a focused case study of an everyday object in colonial Ireland coins flax spinning wheels mud and pigs to examine how each object s unique materiality contributed to the colonial ideology of British paternalism and afforded creative Irish expression The main argument of Irish Materialisms is its methodology of reading literature through the agency of materiality and nonhuman narrative in order to gain a more egalitarian and varied understanding of colonial experience Irish Materialisms proves that new materialism holds powerful postcolonial potential Through an intimate understanding of the materiality Irish peasants handled on a daily basis this book presents a new portrait of Irish character that reflects greater empowerment resistance and expression in the oppressed Irish than has been previously recognized

Ephemeral Print Culture in Early Modern England Tim Somers, 2021 Uses the collections of ephemera popular in the late seventeenth century as a way to understand the reading habits publishing strategies and thought processes of late Stuart print culture Cheap genres of print such as ballads almanacs and playing cards were part of everyday life in seventeenth century society ubiquitous and disposable Toward the end of the century however individuals began to preserve arrange and display articles of cheap print within carefully curated collections What motivated this sudden urge to preserve the ephemeral This book answers that question by analysing the social political and intellectual factors behind the formation of cheap print collections how these collections were used by their owners and what this activity can tell us about print culture in the early modern period The book s central collector is John Bagford 1650 1715 a shoemaker who became a dealer of prints and other curiosities to important collectors of the time such as Samuel Pepys Hans Sloane and Robert Harley Bagford s own rich and largely unstudied collection is a fascinating study in its own right and his position at the centre of commercial and intellectual networks opens up a whole world of collecting This world encompasses later Stuart partisan political culture when modern parties and the public sphere first emerged the New Science and virtuoso culture with its milieu of natural philosophers antiquaries and artisans the aural and visual landscape of marketplaces streets and alehouses and developing practices of record keeping life writing and historical writing during the long eighteenth century

Vernacular Architecture Howard Davis,2024 Vernacular Architecture Critical and Primary Sources brings together for the first time a collection of essential and foundational readings in the study of vernacular architecture and the traditional building cultures of the world Collating scholarly historical texts from the last 200 years from a wide range of sources this four volume set offers a key knowledge resource for the field It creates for the first time a comprehensive framework through which to understand the critical aspects and diverse interpretations of vernacular architecture studies vital to much ongoing research in the built environment in heritage studies and material culture studies Each volume includes a substantial contextualizing introduction while the texts are arranged according to themes which correspond to the chronological and intellectual development of the field reflecting the subject s evolution from primarily rural romantic and traditional interpretations through to thoroughly contemporary and interdisciplinary definitions of the field These contemporary perspectives connect to new scholarship on the explosive growth of cities and the global urban future and are thus the concern not only of scholars who are seeking to understand the built world but also of professional architects planners and citizens who continue to draw lessons from the vernacular and to apply them to design procedures and political formations Accordingly this is a reference collection which enables both a critical understanding of the subject
