combined yet they have received much less attention from the climate policy community The IPR authors propose looking beyond energy efficiency to reduce global carbon footprint This report was developed by the IPR in response to a request from the Group of 7 It conducts a rigorous assessment of the contribution of material efficiency to GHG abatement strategies More concretely it assesses the potential reduction of GHG emissions from material efficiency strategies applied in residential buildings and light duty vehicles and reviews policies that address these strategies The IPR modelling results show that increasing material efficiency can help enhance efforts in moving towards the 1.5 C target set by the Paris Agreement Page 4 of cover

**The Price of Time** Edward Chancellor, 2022-07-07 The first book of the next crisis A history of interest rates by a leading financial commentator updated with a new postscript Winner of the 2023 Hayek Book Prize Longlisted for the 2022 Financial Times Business Book of the Year Award All economic and financial activities take place across time Interest coordinates these activities The story of capitalism is thus the story of interest the price that individuals companies and nations pay to borrow money In *The Price of Time* Edward Chancellor traces the history of interest from its origins in ancient Mesopotamia through debates about usury in Restoration Britain and John Law's ill fated Mississippi scheme to the global credit booms of the twenty first century We generally assume that high interest rates are harmful but Chancellor argues that whenever money is too easy financial markets become unstable He takes the story to the present day when interest rates have sunk lower than at any time in the five millennia since they were first recorded including the extraordinary appearance of negative rates in Europe and Japan and highlights how this has contributed to profound economic insecurity and financial fragility Chancellor reveals how extremely low interest rates not only create asset price inflation but are also largely responsible for weak economic growth rising inequality zombie companies elevated debt levels and the pensions crises that have afflicted the West in recent years conditions under which economies cannot possibly thrive At the same time easy money in China has inflated an epic real estate bubble accompanied by the greatest credit and investment boom in history As the global financial system edges closer to yet another crisis Chancellor shows that only by understanding interest can we hope to face the challenges ahead
