**Reading the Naked Truth** Gerald Coles, 2003 With all the talk and print about scientifically based reading research what educational reformers have concealed is that these findings are scandalously flawed Legislation mandating authoritarian and harmful prepackaged reading instruction does nothing but serve corporate interests and political agendas with little regard paid to actually improving reading skills As he connotes in the title of this urgent expose Gerald Coles uncovers what s absent from all the

claims with which teachers and the public have been assailed He offers a scathing indictment of the National Reading Panel's research and other attempts to undermine reading education and the educators equipped to do it best Strong on slogans Reading First No Child Left Behind but falling far short on science education legislation disguises itself in a cunning apolitical research as final arbiter stratagem And this has only been fortified by the National Institute of Child Health and Human Development whose own studies as Coles proved in *Misreading* Reading are rife with deficiencies in design and reasoning Coles analyzes in detail the language of the National Reading Panel Report provides counterarguments to its claims and investigates significant questions it has raised What were those 100 000 studies the NRP allegedly reviewed What were the qualifications of the members of the NRP Did the panel ask the right questions Were the views represented on the panel sufficiently inclusive Did the NRP satisfy the Congressional mandate to ensure that all children learn to read Without Coles thorough critique of this scientific foundation for reading legislation the media will continue to portray the NRP Report as gospel the public particularly teachers policy makers and parents will have inadequate information for making informed instructional decisions and federal state and local advocates of beginning reading instruction with a skills emphasis will have little opposition in achieving their objectives
