Kalemkerian, Jessica S. Donington, Elizabeth M. Gore, Suresh S. Ramalingam, 2016-11-28 In many ways the field of lung cancer research is leading the way in personalized oncologic care with numerous new treatment strategies moving from clinical trials to standard clinical practice within the past 10 years, and there are no indications of bench-to-bedside innovations slowing down. **Handbook of Thoracic Oncology** is a practical guide to the multidisciplinary management of patients with lung cancer and other thoracic malignancies. The content highlights the applications of both conventional and novel treatment strategies to the care of real-life patients with lung cancer. Unlike many oncology textbooks that exhaustively list studies of historical or failed approaches, this handbook focuses on the application of practical current management options to specific patient subsets and the data that specifically support these strategies. The format is open and readable with bulleted points presenting overall treatment guidelines as well as more nuanced applications of these treatments to individual patient groups. The clear focus of this book is on the question that all oncologists ask themselves every day: How do I take care of this person sitting in front of me? This handbook is an indispensable guide for all oncologists and practitioners who regularly care for lung cancer patients and those suffering from mesothelioma, thymic tumors, and pulmonary neuroendocrine tumors. Features: Delivers the need-to-know points of lung cancer screening, diagnosis, and staging and appropriate multidisciplinary management for all major thoracic malignancies. Provides clinical pearls and treatment recommendations for patients who don't fit the standard guidelines. Includes specific coverage on Management of Elderly and High Risk Patients. Prepares physicians to notice and eliminate common errors in clinical practice when managing patients with lung cancer and other thoracic tumors.

**Lung Cancer** Christina R. MacRosty, M. Patricia Rivera, 2023-10-09 This book provides a comprehensive yet succinct update for the clinician in the diagnosis, staging, and treatment of lung cancer. Lung cancer is a leading cause of death in the US and worldwide, and its prevention, screening, and treatment is a large part of clinical practice across specialties. Frequent updates in recommendations and guidelines in screening, diagnosis, staging, treatment, and management are vital, and it can be difficult for the busy clinician to stay up-to-date. This book provides a comprehensive update for the chest clinician across the continuum of lung cancer care. Each of the thirteen chapters covers a specific component of lung cancer care and is written by experts in the field who are practicing clinicians. The objectives are to provide an organized and easily referenced resource for the chest clinician to provide comprehensive evidence-based information on the following:

topics lung cancer screening and prevention approach to lung nodules diagnosis and staging of lung cancer treatment of lung cancer pleural disease in lung cancer and treatment complications and to provide source information for clinicians so they can stay up to date on any new guidelines or recommendations related to lung cancer screening tobacco treatment staging and diagnosis This book is written specifically for the busy clinician that focuses on clinically relevant and evidence based principles around lung cancer while providing references for ease of finding source information to enable clinicians to stay updated as guidelines change This is an ideal guide for practicing pulmonary clinicians practicing general practice clinicians trainees in chest and general medicine as well as some advanced practice providers who need a refresher
