*Overtested* Jessica Zacher-Pandya, 2015-04-24 This timely book explores what is often overlooked in policy debates about the education of English language learners how the day to day dynamics of the classroom are affected by high stakes testing and the pressures students and teachers experience and internalize as a result The author presents and analyzes classroom observations student work and test scores as well as interviews with students and teachers A disturbing picture of today's overtested public school classroom emerges from the events and practices described in this book While hard to believe all the depictions presented took place in a real elementary school classroom and reflect the current culture of extreme accountability *Overtested* not only describes the flaws in our current accountability system but it also provides real world solutions that can have an immediate and positive effect at the classroom state and national level Chapters address key debates such as how to measure proficiency the validity of various language assessment tools the overuse of assessment and the risks and benefits of teaching language arts to English language learners via mandated structured curricula Jessica Zacher Pandya is an Associate Professor in the Departments of Teacher Education and Liberal Studies at California State University Long Beach This book tells an important tale that cannot be conveyed by numbers and tables It is important information for teachers for those who depend on employ and train teachers and for those who create the policies under which teachers are required to operate From the Foreword by Robert Rueda University of Southern California author of *The 3 Dimensions of Improving Student Performance Finding the Right Solutions to the Right Problems* How many more dire tales of schooling for assessment must be told before we realize that teaching and testing are not the same and that scores on standardized multiple choice achievement tests are a sorry substitute for an engaging learning environment In this book Jessica Zacher Pandya reaches across ideological and institutional borders to offer reasonable pragmatic solutions for change Linda Valli Jeffrey David Mullan Professor of Teacher Education Professional Development College of Education University of Maryland Zacher Pandya's invaluable book exposes the injustices and absurdities of our high stakes accountability era Just as importantly it limns a more academically robust and culturally relevant instructional vision for English language learners Gerald Campano University of Pennsylvania **Tested** Linda Perlstein, 2007-07-24 The pressure is on at schools across America In recent years reforms such as No Child Left Behind have created a new vision of education that emphasizes provable results uniformity and greater attention for floundering students Schools are expected to behave more like businesses and judged almost solely on the bottom line test scores To see if this world is producing better students Linda Perlstein immersed herself in a suburban Maryland elementary school The resulting portrait detailed human and truly thought provoking is marked by the same narrative gifts and expertise that made *Not Much Just Chillin* so illuminating The school once deemed a failure is now held up as an example of reform done right Perlstein explores the rewards and costs of that transformation through the experiences of the people who lived it Nine year olds meditate to activate their brains before

exams and kindergartners write paragraphs Teachers attempt to address diverse needs at the same time they are expected to follow daily scripts and feel compelled to focus on topics that will be tested at the expense of those that won't. The principal attempts to keep it all together in the face of immense challenges Perlstein provides the first detailed view of how new education policies are modified by human realities Tested will be talked about thought about written about and will almost certainly play an important role in the national debate as the federal education law come up for renewal
