Sowe, Govindan Parayil, Atsushi Sunami, 2012 A global collection of experts in social, natural, and human sciences with contributions from researchers and practitioners in both developing and developed countries cover the theoretical and practical implications of FOSS technologies. While FOSS development, education, and business potentials may appear as a phenomenon for the developed world, a sizable number of developing countries have implemented FOSS policies of their own. Empirical and anecdotal evidence continues to demonstrate the potential of FOSS technologies for giving people the opportunity to participate actively in the development and shaping of their own technology, stimulating the growth of indigenous software industries creating local jobs and lowering technology acquisition and deployment costs.
