**String Processing and Information Retrieval** Alberto H.F. Laender, Arlindo L. Oliveira, 2003-08-02 This volume of the Lecture Notes in Computer Science series provides a comprehensive state of the art survey of recent advances in string processing and information retrieval. It includes invited and research papers presented at the 9th International Symposium on String Processing and Information Retrieval SPIRE2002 held in Lisbon Portugal. **Innate Tolerance in the CNS** Jeffrey M. Gidday, Miguel A. Perez-Pinzon, John H. Zhang, 2012-09-21 Cerebral preconditioning is a phenomenon wherein a mild insult or stress induces cellular and tissue adaptation or tolerance to a later severe injury therefore reflecting the efficacy of endogenous mechanisms of cerebrovascular protection. Initially identified for rapid cardiac protection preconditioning has expanded to all aspects of CNS protection from ischemia trauma and potentially neurodegeneration. Many different stimuli or stressors have been identified as preconditioning agents suggesting a downstream convergence of mechanisms and underscoring the potential for translational application of preconditioning in the clinic. Moreover the fundamental mechanisms responsible for preconditioning induced tolerance will help in the design novel pharmacological approaches for neuroprotection. While stroke and many other brain injuries are not predictable in some populations e.g. metabolic syndrome patients undergoing carotid endarterectomy aneurysm clipping or with recent TIAs the risk for stroke is identifiable and significant and preconditioning may represent a useful strategy for neuroprotection. For unpredictable injuries post conditioning the brain or inducing endogenous protective mechanisms after the initial injury can also abrogate

the extent of injury Finally remote pre and post conditioning methods have been developed in animals and are now being tested in clinical trials wherein a brief noninjurious stress to a noncerebral tissue i e skeletal muscle can provide protection to the CNS and thereby allows clinicians the opportunity to circumvent concerns regarding the direct preconditioning of neurological tissues     *Statistical Theory and Method Abstracts* ,1998
