increased widespread application of battery technology has real environmental benefits that could change the future of our planet. Is 21st century battery technology the foundation on which our low carbon future will be built? The Electric Battery Charging Forward to a Low Carbon Future documents the long history of the battery and identifies the reasons it is now a key to achieving a low carbon world. The book provides an unprecedented and easy to understand explanation of both the policy issues and technological challenges facing the battery in the quest to significantly reduce humanity's collective carbon footprint on the earth. Readers will be able to intelligently evaluate the chances of electric storage batteries ultimately becoming as mainstream as petroleum product fueled infrastructure and vehicles. The chapters in the book break down the complexity of the technology and elucidate the historic confluence of events that makes battery technology economically viable to any reader looking to understand the technological and policy breakthroughs that could enable a low carbon future for this generation as well as for subsequent ones.

**The Electrical Engineer**, 1888 Tesla's Market Entry Strategy in Germany. Foreign Market Entry and Cross-Cultural Business Simon Glandien, 2020-11-18 Academic Paper from the year 2020 in the subject Business economics Business Management Corporate Governance grade A course Cross Cultural Business language English abstract The purpose of this paper is to analyze and evaluate the market entry of Tesla Inc in Germany. In November 2019 Tesla revealed to build a European production plant on the outskirts of Berlin in Germany. The aim of this paper is to give account to the foreign market entry of Tesla Inc in Germany. This leads to the following research question that guides this paper: What could be business success factors and threats of Tesla's strategy to enter the German automotive industry market? Tesla Inc former Tesla Motors Inc is a car manufacturer and sells fully electric vehicles, energy storage systems as well as installs, operates and maintains solar and energy storage products. Reuters n.d. The company was founded in 2003 by a group of engineers. In 2008 Tesla launched their first electric vehicle to the market. Tesla n.d. Tesla's mission is to accelerate the world's transition to sustainable energy, so the car manufacturer. So far most of the Tesla vehicles are produced and assembled in the United States at its main Tesla Factory in Fremont, California. To that Tesla operates other multiple production and assembly plants named Gigafactory such as in Fremont, California, Giga Nevada and in Buffalo, New York, Giga New York. Recently in 2019 Tesla opened its first Gigafactory outside the American region in Shanghai, China. Giga Shanghai is a strategic step to internationalize the company and to enter the Chinese market. This strategic action can be explained by the fact that China is the largest car market in the world and the government is speeding up the expansion of electric mobility. Furthermore, manufacturing in Shanghai saves Tesla from having to transport its vehicles overseas and avoids import duties incurred in China for cars from the United States. However, the company is not just expanding its manufacturing into China.
