Metric Methods for Analyzing Partially Ranked Data Douglas E. Critchlow,1985 **Metric Methods for Analyzing Partially Ranked Data** Douglas E. Critchlow,2012-12-06 A full ranking of n items is simply an ordering of all these items of the form first choice second choice n th choice If two judges each rank the same n items statisticians have used various metrics to measure the closeness of the two rankings including Kendall's tau Spearman's rho Spearman's footrule Ulam's metric Hamming distance and Cayley distance These metrics have been employed in many contexts in many applied statistical and scientific problems This monograph presents general methods for extending these metrics to partially ranked data Here partially ranked data refers for instance to the situation in which there are n distinct items but each judge specifies only his first through k th choices where k

Probability Models and Statistical Analyses for Ranking Data

Michael A. Fligner,Joseph S. Verducci,2012-12-06 In June of 1990 a conference was held on Probability Models and Statistical Analyses for Ranking Data under the joint auspices of the American Mathematical Society the Institute for Mathematical Statistics and the Society of Industrial and Applied Mathematicians The conference took place at the University of Massachusetts Amherst and was attended by 36 participants including statisticians mathematicians psychologists and sociologists from the United States Canada Israel Italy and The Netherlands There were 18 presentations on a wide variety of topics involving ranking data This volume is a collection of 14 of these presentations as well as 5 miscellaneous papers that were contributed by conference participants We would like to thank Carole Kohanski summer program coordinator for the American Mathematical Society for her assistance in arranging the conference M Steigerwald for preparing the manuscripts for publication Martin Gilchrist at Springer Verlag for editorial advice and Persi Diaconis for contributing the Foreword Special thanks go to the anonymous referees for their careful readings and constructive comments Finally we thank the National Science Foundation for their sponsorship of the AMS IMS SIAM Joint Summer Programs Contents Preface vii Conference Participants xiii Foreword xvii 1 Ranking Models with Item Covariates 1 D E Critchlow and M A Fligner 1 1 Introduction 1 1 2 Basic Ranking Models and Their Parameters 2 1 3 Ranking Models with Covariates 8 1 4 Estimation 9 1 5 Example 11 1 6 Discussion 14 1 7 Appendix 15 1 8 References Statistical Models and Methods for Data Science Leonardo Grilli,Monia Lupparelli,Carla Rampichini,Emilia Rocco,Maurizio Vichi,2023-07-24 This book focuses on methods and models in classification and data analysis and presents real world applications at the interface with data science Numerous topics are covered ranging from statistical inference and modelling to clustering and factorial methods and from directional data analysis to time series analysis and small area estimation The applications deal with new developments in a variety of fields including medicine finance engineering marketing and cyber risk The contents comprise selected and peer reviewed contributions presented at the 13th Scientific Meeting of the Classification and Data Analysis Group of the Italian Statistical Society CLADAG 2021 held online in Florence Italy on September 9 11 2021 CLADAG promotes advanced methodological

Helmut Rieder,2012-12-06 To celebrate Peter Huber's 60th birthday in 1994 our university had invited for a festive occasion in the afternoon of Thursday June 9. The invitation to honour this outstanding personality was followed by about fifty colleagues and former students from mainly all over the world. Others who could not attend sent their congratulations by mail and e-mail. It's hard to imagine that Peter turned 60. After a welcome address by Adalbert Kerber, dean, the following lectures were delivered: Volker Strassen, Konstanz, Almost Sure Primes and Cryptography; an Introduction by Frank Hampel, Zurich; On the Philosophical Foundations of Statistics; 1. Andreas Buja, Murray Hill, Projections and Sections; High Dimensional Graphics for Data Analysis. The distinguished speakers lauded Peter Huber as a hard and fair mathematician, a cooperative and stimulating colleague and an inspiring and helpful teacher. The Festkolloquium was surrounded with a musical program by the University's Brass Ensemble. The subsequent Workshop Robust Statistics, Data Analysis and Computer Intensive Methods in Schloss Thurnau, Friday until Sunday June 9-12, was organized about the areas in statistics that Peter Huber himself has markedly shaped. In the time since the conference, most of the contributions could be edited for this volume, a late birthday present that may give a new impetus to further research in these fields.

Advanced Computing in Industrial Mathematics Ivan Georgiev, Hristo Kostadinov, Elena Lilkova, 2021-04-03 This book gathers the peer-reviewed proceedings of the 13th Annual Meeting of the Bulgarian Section of the Society for Industrial and Applied Mathematics (BGSIAM 18) held in Sofia, Bulgaria. The general theme of BGSIAM 18 was industrial and applied mathematics with particular focus on mathematical physics, numerical analysis, high performance computing, optimization and control, mathematical biology, stochastic modeling, machine learning, digitization and imaging, advanced computing in environmental, biomedical and engineering applications.

Statistical Methods in Counterterrorism Alyson Wilson, Gregory Wilson, David H. Olwell, 2007-01-15 With the realization that many clues and hints preceded the September 11 terrorist attacks, statisticians became an important part of the global war on terror. This book surveys emerging research at the intersection of national security and statistical sciences. In it, a diverse group of talented researchers address such topics as Syndromic Surveillance Modeling and Simulation, Biometric Authentication and Game Theory. The book includes general reviews of quantitative approaches to counterterrorism for decision makers with policy backgrounds as well as technical treatments of statistical issues that will appeal to quantitative researchers.

Advances in Data Science and Classification

International Federation of Classification Societies. Conference, Alfredo Rizzi, 1998-07-10 The book provides new developments in classification and data analysis and presents new topics which are of central interest to modern statistics. In particular these include classification theory, multivariate data analysis, multi way data proximity structure analysis, new software for classification and data analysis and applications in social, economic, medical and other sciences. For many of these topics this book provides a systematic state of the art written by top researchers in the world. This book will serve as a helpful introduction to the area of classification and data analysis for research workers and support the transfer of new advances in data science and classification to a wide range of applications

Classification and Dissimilarity Analysis

Bernard van Cutsem, 1994-10-07 Lecture Notes in Statistics provides a format for the informal publication of monographs, conference proceedings, case studies and similar material of theoretical or empirical importance. The timeliness of a manuscript is more important than its form which may be unfinished or tentative. Thus in some instances proofs may be merely outlined and results presented which have recently been or will later be published elsewhere. If possible a subject index should be included. Publication of the Lecture Notes is intended as a service to the international statistical community in that a commercial publisher Springer Verlag can provide efficient distribution of documents which would otherwise have a restricted readership. Once published and copyrighted they can be documented and discussed in the scientific literature
