Hanged at Durham Steve Fielding,2013-07-01 For decades the high walls of Durham gaol have contained some of the countrys most infamous criminals Until hanging was abolished in the 1960s it was also the main centre of execution for convicted killers from all over the north east The history of execution within the walls of Durham Gaol began with the hanging of two labourers side by side in 1869 by the notorious hangman William Calcraft Over the next ninety years a total of seventy seven people took the short walk to the gallows including poisoner Mary Cotton who for over a century was the worst mass murderer in Great Britain Gatesheads copycat Jack the Ripper William Waddell army deserter Brian Chandler nineteen year old Edward Anderson who murdered his blind uncle a Teeside dock worker hanged on Christmas Eve Carlisle muderer John Vickers the first man hanged under the 1957 Homocide Act and a South African sailor who preferred death to ten years in prison Infamous executionors also played a part in the gaols history Calcraft who preferred slow strangulation Marwood the pioneer of the long drop bungling Bartholomew Binns the Billingtons the Pierrepont family and Doncaster hangman Stephen Wade Steve Fielding's highly readable new book features each of the seventy five cases in one volume for the first time and is fully illustrated with photographs news cuttings and engravings It is bound to appeal to anyone interested in the darker side of County Durhams history **Disputed Inheritance** Gregory Radick,2023-08-18 A root and branch rethinking of how history has shaped the science of genetics In 1900 almost no one had heard of Gregor Mendel Ten years later he was famous as the father of a new science of heredity genetics Even today Mendelian ideas serve as a standard point of entry for learning about genes The message students receive is plain the twenty first century owes an enlightened understanding of how biological inheritance really works to the persistence of an intellectual inheritance that traces back to Mendel's garden Disputed Inheritance turns that message on its head As Gregory Radick shows Mendelian ideas became foundational not because they match reality little in nature behaves like Mendel's peas but because in England in the early years of the twentieth century a ferocious debate ended as it did On one side was the Cambridge biologist William Bateson who in Mendel's name wanted biology and society reorganized around the recognition that heredity is destiny On the other side was the Oxford biologist W F R Weldon who admiring Mendel's discoveries in a limited way thought Bateson's Mendelism

represented a backward step since it pushed growing knowledge of the modifying role of environments internal and external to the margins Weldon's untimely death in 1906 before he could finish a book setting out his alternative vision is Radick suggests what sealed the Mendelian victory Bringing together extensive archival research with searching analyses of the nature of science and history Disputed Inheritance challenges the way we think about genetics and its possibilities past present and future
