Aesthetics after Darwin Winfried Menninghaus, 2019-12-10 Darwin famously proposed that sexual competition and courtship is or at least was the driving force of art production not only in animals but also in humans The present book is the first to reveal that Darwin's hypothesis rather than amounting to a full blown antidote to the humanist tradition is actually strongly informed both by classical rhetoric and by English and German philosophical aesthetics thereby Darwin's theory far richer and more interesting for the understanding of poetry and song The book also discusses how the three most discussed hypothetical functions of the human arts competition for attention and loving acceptance social cooperation and self enhancement are not mutually exclusive but can well be conceived of as different aspects of the same processes of producing and responding to the arts Finally reviewing the current state of archeological findings the book advocates a new hypothesis on the multiple origins of the human arts posing that they arose as new variants of human behavior when three ancient and largely independent adaptations sensory and sexual selection driven biases regarding visual and auditory beauty play behavior and technology joined forces with and were transformed by the human capacities for symbolic cognition and language

Historical Linguistics 2019 Bethwyn Evans, Maria Kristina Gallego, Luisa Miceli, 2024-11-15 This volume comprises a selection of papers that were presented at the 24th International Conference on Historical Linguistics ICHL24 which took place at the Australian National University ANU in Canberra from 1-5 July 2019. The volume's aim is to reflect the breadth of research presented at the conference with each chapter representative of a workshop or themed session. A striking aspect of ICHL24 was the three-day workshop on computational and quantitative approaches to historical linguistics and two of the chapters represent different aspects of this workshop. A number of chapters present research that explores mechanisms and processes of change within specific domains of language while others explore interactions of change across linguistic domains. Two chapters represent a common theme at the conference and consider the role of historical linguistics in explaining non-linguistic histories of language diversification.
