Micro Clusters And Networks Routledge Advances In Tourism:

Advances in Service Network Analysis Noel Scott, Eric Laws, 2013-09-13 Advances in Service Network Analysis examines advances in the management and analysis of networks of organizations in service industries. In recent years recognition of the significance of inter-organizational networks for the provision of complex services for example at tourist destinations has stimulated discussion of numerous issues of theoretical and practical significance. These topics include governance, collaboration and partnerships between organizations of varying scale, sophistication and expertise, concern about leadership and trust in the management of service networks and their overall contribution to social capital development in regions, sectors and in emergent economies. This book was originally published as a special issue of The Service Industries Journal.

Micro-Clusters and Networks Ewen Michael, 2006-10-19 This book introduces a new approach to the analysis and management of growth in small tourism markets for regional and rural locations. It recognizes from the outset that the vast bulk of the tourism industry's product is delivered by small business enterprises and that many of these are located outside of metropolitan areas. Its central premise is that a myriad of small scale clusters can provide an effective means to establish a local competitive advantage in tourism activities based on the resources of existing communities. The book brings together contemporary views of the potential of clustering theory to promote development in micro markets within the paradigm of competition to create a new framework for regional development that might serve to enhance the growth of small scale tourism destinations. Microclusters and Networks provides a theoretical explanation of how and why micro clusters come about with chapters by specialist authors to illustrate examples of their practice in the real world but it goes further to demonstrate not only why they work but also how community members interact to form successful clusters. The incorporation of networking theory provides the means to explain the role of local community interaction in delivering successful social outcomes. The analysis that is provided clearly has applications for many industries beyond the development of rural and regional tourism destinations.

European Journal of Tourism Research, 2011-10-01 The European Journal of Tourism Research is an academic journal in the field of tourism published by Varna University of Management, Bulgaria.
