### Selecting Files&Directories

|                         |                                                         |
|-------------------------|---------------------------------------------------------|
| ins.<br>(Insert<br>key) | Toggle selection of the focus item and move down.       |
| - (*)                   | For entering a pattern to select items by (i.e. *.txt). |
| - (*)                   | For entering a pattern to unselect items by.            |

### Selecting Files&Directories (cont)

|   |                                                      |
|---|------------------------------------------------------|
| - | Reverse file selections in (folders are unaffected). |
|---|------------------------------------------------------|

All selection commands affect the current window only.  
(\*) Only if no commandline was entered.

### Commandline placeholders

|           |                                                                                            |
|-----------|--------------------------------------------------------------------------------------------|
| %s        | The selected item in the current windows. The focused item, if there are no selected ones. |
| %d,<br>%D | The director yshown in the current(%d) or other(%D) window.                                |
| %D/%S     | Complete filenames of the other window.                                                    |
| %%        | A single %-character.                                                                      |

Example: unzip %D/%S (Extracts selected zip file from the other window into the current one).

### Important file actions

|                  |                                                                                                                     |
|------------------|---------------------------------------------------------------------------------------------------------------------|
| F5               | Copy selected files/folders (other window's path is pre-selected).                                                  |
| F6               | Move selected files/folders (other window's path is pre-selected).                                                  |
| Shift+F6         | Rename focused file (current name can be edited).                                                                   |
| Ctrl+X<br>Ctrl+A | Edit target of focused symbolic link.                                                                               |
| F8               | Delete selected or focused item(s). There's no virtual trashbin.                                                    |
| F3               | Show text content of focused file.                                                                                  |
| Ctrl+Space       | If folders are selected: Calculate subtree size.<br>If not: Calculate subtree size of focused folder and move down. |
