of the diverse traditions of medical humanism classical philology and natural philosophy Renaissance naturalists created a
new science devoted to discovering and describing plants and animals Drawing on published natural histories manuscript
correspondence garden plans travelogues watercolors and drawings The Science of Describing reconstructs the evolution of
this discipline of description through four generations of naturalists In the late fifteenth and early sixteenth centuries
naturalists focused on understanding ancient and medieval descriptions of the natural world but by the mid sixteenth century
naturalists turned toward distinguishing and cataloguing new plant and animal species To do so they developed new
techniques of observing and recording created botanical gardens and herbaria and exchanged correspondence and
specimens within an international community By the early seventeenth century naturalists began the daunting task of sorting
