Solving Elliptic Problems Using ELLPACK John R. Rice, Ronald F. Boisvert, 2012-12-06 ELLPACK is a many faceted system for solving elliptic partial differential equations It is a forerunner of the very high level problem solving environments or expert systems that will become common in the next decade While it is still far removed from the goals of the future it is also far advanced compared to the Fortran library approach in common current use Many people will find ELLPACK an easy way to solve simple or moderately complex elliptic problems Others will be able to solve really hard problems by digging a little deeper into ELLPACK ELLPACK is a research tool for the study of numerical methods for solving elliptic problems Its original purpose was for the evaluation and comparison of numerical software for elliptic problems Simple examples of this use are given in Chapters 9 11 The general conclusion is that there are many ways to solve most elliptic problems there are large differences in their efficiency and the most common ways are often less efficient sometimes dramatically so
