## **Roblox Simulator Comparison Reviews:**

Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD2022 Summer which was held on July 4-6 2022 at Kyoto City Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science. **New Forms of**

**Civic Resistance and Activism** Tine Munk, Elliot Doornbos, Ian Mahoney, 2025-12-16 This interdisciplinary collection examines how contemporary movements are reshaping political, social and environmental landscapes through both online and offline means, including creative expression and grassroots mobilisation. This book analyses non-violent activism, political resistance, mobilisation, responses to hate and environmental activism. It brings together a wide range of academic perspectives with contributions from scholars and practitioners across the social sciences and humanities, political science, the natural sciences and environmental studies. By examining the synergy between online and offline actions, it highlights how these actions are interconnected with online platforms and virtual spaces and, in doing so, it addresses the urgent need for compelling and legitimate civic resistance strategies in the modern world. It explores the intersection of digital platforms and real-world action, providing fresh insights into how activism is increasingly transcending geographical, technological and conceptual boundaries. *New Forms of Civic Resistance and Activism* will appeal to scholars and students of criminology, social and political science, environmental studies, media and communication studies, cybercrime and cyber security. It will also interest activists, policymakers, practitioners and general readers who are curious about contemporary social movements.
