Electric Vehicle Progress ,1999

Speed Control of Interior Permanent Magnet Synchronous Machine Jigneshkumar Desai,2022-09-27 Document from the year 2022 in the subject Engineering General grade 12 language English abstract The creation of a simulation model for closed loop vector controlled IPMSM drive performance enhancement and speed control is described in this book By regulating the torque component of the current the model achieves superior speed tracking and rapid dynamic response under transient and steady state circumstances The control technique is used by both the proportional and integrated controllers in the PI controller Combining two independent controllers and reducing the shortcomings of each results in a more effective controller To offer optimal speed operation in the face of environmental changes load variations and structural disturbances the Fuzzy Logic Controller for PMSM must be properly constructed Using MATLAB Simulink this book gives a comprehensive simulation of an internal permanent magnet synchronous motor driving system Interior permanent magnet synchronous motors IPMSMs are used to improve machine performance and offer rapid torque response IPMSMs are utilised in low and medium power applications such as servos robotics variable speed motors electric vehicles and computer peripherals Because PM motor drives are becoming more popular simulation systems capable of handling motor drive simulations are in great demand Simulation tools can dynamically simulate motor drives in a visual environment saving money and time and easing the development of new systems

The Bhutan Electric Vehicle Initiative Da Zhu,Dominic Pasquale Patella,Roland Steinmetz,Pajnapa Peamsilpakulchorn,2016-04-06 As the country that inspires the world with gross national happiness development philosophy Bhutan is striving to pursue its economic growth while committing to its core values of inclusive and green development Even with robust economic growth rates Bhutan s dependence on imports and hydropower revenues

drives the country to search for self reliant option to fuel the economy while further decarbonizing the economy Electric vehicle is being explored as one of the key policies to introduce green mobility reduce fossil fuel imports and put the country firmly on a green growth path Globally electric vehicles market and technology are still in the nascent stage but are developing rapidly The automotive industry has adopted electrification as a pillar of future drive train technology EV uptake is expected to increase significantly with ongoing improvements in technology and resulting cost decreases in the global market This report aims to help Bhutan think through various technical and policy issues of introducing electric vehicles in its own context It analyses a variety of factors that will impact adoption of electric vehicles from technical market and financial feasibility to consumer awareness and stakeholders capacity It also addresses several policy questions which are at the heart of public debate such as affordability of the government to undertake the program economic costs and benefits distributional impact fiscal and macroeconomic implications Drawing from vast international experiences the report examines in great technical details how global cutting edge technology like electric vehicles could be pursued in the context of developing economies with different socio economic characteristics and constraints compared to advanced economies It will help readers better grasp the technical financial economic and social challenges as well as opportunities in initiating electric vehicles program and provide practical recommendations that will be useful for policy makers in designing their own EV initiative
