Migration And Identity In A Post National World Global Ethics:

Migration and Identity in a Post-National World K. Tonkiss, 2015-12-04 Katherine Tonkiss offers a succinct account of constitutional patriotism theory specifically arguing that it involves a commitment to free migration She draws on qualitative research to explore the implications of this claim for the dynamics of post national identity and belonging in local communities Routledge Handbook of Global Citizenship Studies Engin Isin, Peter Nyers, 2014-06-27 Citizenship studies is at a crucial moment of globalizing as a field What used to be mainly a European North American and Australian field has now expanded to major contributions featuring scholarship from Latin America Asia Africa and the Middle East The Routledge Handbook of Global Citizenship Studies takes into account this globalizing moment At the same time it considers how the global perspective exposes the strains and discords in the concept of citizenship as it is understood today With over fifty contributions from international interdisciplinary experts the Handbook features state of the art analyses of the practices and enactments of citizenship across broad continental regions Africas Americas Asias and Europes as well as deterritorialized forms of citizenship Diasporicity and Indigeneity Through these analyses the Handbook provides a deeper understanding of citizenship in both empirical and theoretical terms This volume sets a new agenda for scholarly investigations of citizenship Its wide ranging contributions and clear accessible style make it essential reading for students and scholars working on citizenship issues across the humanities and social sciences Labour Migration in the European Union Gönül Oğuz, 2020-03-12 No analysis of migration in Europe today can avoid consideration of the role of the EU institutions as well as the member states in policy making This is because the obstacles for labour mobility which have confronted the EU in the post enlargement period have been multi dimensional in nature have encompassed many different aspects of European integration process and have operated at many different levels Recent developments in the free movement of labour in Europe entail a comprehensive analysis of the dynamic of migration policy process contextualising institutional change cooperation control and competition between the EU institutions and the member states This book provides a picture of how governance of labour migration is constructed managed negotiated and decided at the European level It brings together in an informed and well organized way some of the key issues in the face of current migration crises and Brexit The History and Politics of Free Movement within the European Union Saila Heinikoski, 2020-11-26 The right to free movement is the one privilege that EU citizens value the most in the Union but one that has also created much political controversy in recent years as the debates preceding the 2016 Brexit referendum aptly illustrate This book examines how European politicians have justified and criticized free movement from the commencement of the first Commission of the EU 25 in November 2004 to the Brexit referendum in June 2016 The analysis takes into account the discourses of Heads of State Governments and Ministers of the Interior or Home Secretaries of six major European states the UK Germany France Italy Spain and Romania In addition to these national leaders the speeches of European Commissioners responsible for free movement matters are

also considered The book introduces a new conceptual framework for analysing practical reasoning in political discourses and applies it in the analysis of national free movement debates contextualised in respective migration histories In addition to results related to political discourses the study unearths wider problems related to free movement including the diversified and variegated approaches towards different groups of movers as well as the exclusive attitudes apparent in both discourses and policies The History and Politics of Free Movement within the European Union is of interest to anyone studying national and European politics and ideologies contemporary history migration policies and political argumentation Citizenship and Human Rights Christian H Kälin, 2024-02-08 Can universal human rights and different national citizenship regimes ever be compatible This book argues that they can't setting out a legal philosophical critique of the tension between both It explores whether the emergence of postnational models of citizenship that aim at decoupling human rights and citizenship succeed in overcoming tensions between the universal multiculturalism universal human rights postnational values and the particular citizenship borders national values and diverse local narratives As a result of this exploration the author argues that it is illegitimate to speak of universal human rights universal human dignity or universal social justice It is only by recognising this reality that a much needed transformation of human rights and citizenship can be undertaken in a meaningful way This provocative and compelling work will appeal to both human rights and citizenship lawyers as well as others involved in human rights law at NGOs governments international organisations and indeed anyone with an interest in the subject of how human rights evolved and new concepts for the future

It demonstrates how ethno nationalism is not simply the recourse of minorities seeking separation from existing states but
that it can also be associated with dominant and majority groups The contributors explore this complex phenomenon through
a series of case studies and analyse its wide geographical spread from India to Bolivia and from Russia to Spain Different
angles on the Irish case are presented and a comparative analysis underscoring the options available for accommodating
ethno nationalist parties and movements is also included The volume is multidisciplinary and the authors employ a variety of
