**Motivation Science** James Y. Shah, Wendi L. Gardner, 2013-12-09 Integrating significant advances in motivation science that have occurred over the last two decades this volume thoroughly examines the ways in which motivation interacts with social developmental and emotional processes as well as personality more generally The Handbook comprises 39 clearly written chapters from leaders in the field Cutting edge theory and research is presented on core psychological motives such as the need for esteem security consistency and achievement motivational systems that arise to address these fundamental needs the process and consequences of goal pursuit including the role of individual differences and contextual moderators and implications for personal well being and interpersonal and intergroup relations **The Psychology of Goals** Gordon B.

Moskowitz, Heidi Grant, 2009-01-16 Bringing together leading authorities this tightly edited volume reviews the breadth of current knowledge about goals and their key role in human behavior Presented are cutting edge theories and findings that shed light on the ways people select and prioritize goals how they are pursued factors that lead to success or failure in achieving particular aims and consequences for individual functioning and well being Thorough attention is given to both

conscious and nonconscious processes The biological cognitive affective and social underpinnings of goals are explored as is their relationship to other motivational constructs

**To Flourish Or Destruct** Christian Smith,2021-02-06 In his 2010 book *What Is a Person* Christian Smith argued that sociology had for too long neglected this fundamental question Prevailing social theories he wrote do not adequately capture our deep subjective experience as persons crucial dimensions of the richness of our own lived lives what thinkers in previous ages might have called our souls or hearts Building on Smith's previous work *To Flourish or Destruct* examines the motivations intrinsic to this subjective experience Why do people do what they do How can we explain the activity that gives rise to all human social life and social structures Smith argues that our actions stem from a motivation to realize what he calls natural human goods ends that are by nature constitutionally good for all human beings He goes on to explore the ways we can and do fail to realize these ends a failure that can result in varying gradations of evil Rooted in critical realism and informed by work in philosophy psychology and other fields Smith's ambitious book situates the idea of personhood at the center of our attempts to understand how we might shape good human lives and societies

**Professional Generalism in a Hyper-specialised World** Nektarios Karanikas,2025-04-01 This book challenges the notion that extreme professional expertise is the only path to success advocating instead for the concept of professional generalism as a complementary approach It brings together ideas from various disciplines offering insights relevant to all professionals regardless of specialisation The chapters of the book explore concepts and frameworks that are not typically discussed together in a single work and challenge the reader to test and contextualise them The book aims to inspire professionals to explore principles beyond their usual scope and to recognise opportunities to integrate concepts from other disciplines into their practice It encourages readers to consider how different approaches and perspectives can intersect and complement each other breaking down professional silos and fostering a more interconnected way of thinking Rather than promoting simplistic or middle ground solutions the book emphasises the value of considering diverse perspectives and approaches recognising that different contexts may require different paradigms It encourages readers to embrace complexity and diversity fostering a holistic and nuanced perspective essential for navigating today's interconnected professional landscapes

**Virtue Epistemology** Stephen Napier,2008-09-01 Contemporary epistemology debates have largely been occupied with formulating a definition of knowledge that is immune to any counterexample To date no definition has been able to escape unscathed Moving away from debates about definitions *Virtue Epistemology* shows what conditions are essential for knowledge and applies this account to different domains It proposes that agents must be motivated correctly to acquire knowledge even in the case of perception Stephen Napier examines closely the empirical research in cognitive science and moral psychology to build an account of knowledge wherein an agent must perform acts of virtue in order to get knowledge In so doing Napier provides answers to two key questions what is knowledge and how do we get it
