Motivation To Learn Integrating Theory And Practice 4th Edition:

Motivation to Learn Deborah J. Stipek, 2002 This book integrates theory and research in motivation and applies them to classroom practice. This book gives readers a thorough understanding of motivation theories that can be applied to the needs of their students. Teachers can use these research based theories to develop problem solving skills in a range of educational contexts. The focus is on classroom learning but attention is also given to how strategies used to motivate students in schools affect their motivation to participate in intellectual activities outside of school. For educators at all grade levels.

Motivation to Learn Deborah J. Stipek, 1993 Motivating students to achieve is a challenging and often frustrating task for today's teachers. This book provides readers with the underlying theories behind motivating their students by integrating theory research and practical issues related to achievement motivation. This teacher centered book gives clear practical guidelines for diagnosing and improving student's motivation. The focus is on classroom learning but attention is also given to how strategies used to motivate students in schools affect their motivation to participate in intellectual activities outside of school. Teachers and other educators

Motivating Students to Learn Kathryn R. Wentzel, 2014-02-18 Written specifically for teachers. *Motivating Students to Learn* offers a wealth of research based principles on the subject of student motivation for use by classroom teachers. Now in its fourth edition, this book discusses specific classroom strategies by tying these principles to the realities of contemporary schools curriculum goals and classroom dynamics. The authors lay out effective extrinsic and intrinsic strategies to guide teachers in their day to day practice, provide guidelines for adapting to group and individual differences, and discuss ways to reach students who have become discouraged or disaffected learners. This edition features new material on the roles that classroom goal setting, developing students' interest, and teacher, student, and peer relationships play in student motivation. It has been reorganized to address six key questions that combine to explain why students may or may not be motivated to learn. By focusing more closely on the teacher as the motivator, this text presents a wide range of motivational methods to help students see value in the curriculum and lessons taught in the classroom.

Motivating Students to Learn Jere E. Brophy, 2004 Written specifically for teachers, this book offers a wealth of research based principles for motivating students to learn within the realities of a classroom learning community. Its focus on motivational principles rather than motivational theorists or theories leads naturally into discussions of specific classroom strategies. Throughout the book, the author focuses on and expertly synthesizes that portion of the motivational literature that is most relevant to teachers. Key features of this expanded new edition include Focus on School and Classroom Realities. The selection and treatment of motivational principles and strategies is constantly tied to the realities of schools e.g. curriculum goals and classrooms e.g. student differences, classroom dynamics. Integrates Intrinsic and Extrinsic Principles. The author employs an eclectic approach to motivation that shows how to effectively integrate the use of intrinsic and extrinsic strategies. Covers Expectancy and Value Related Topics. Full coverage is given to both the expectancy aspects of motivation

attributions efficacy perceptions expectations confidence etc and to value related topics relevance meaningfulness application potential and to their associated teacher student dynamics New Chapters Two theories that have spurred much education related motivational research in recent years self determination theory and achievement goal theory have been given their own chapters Focus on Individual Differences and Problem Learners Guidelines are provided for adapting motivational principles to group and individual student differences and for doing repair work with students who have become discouraged or disaffected learners Expanded Topical Coverage Expanded coverage has been given to several emerging topics including self identity concepts cross cultural comparisons situational interest stereotype threat and the rediscovery of John Dewey s motivational ideas Improved Pedagogy Chapter and section introductions and summaries provide an unusual degree of continuity across the book and its second person writing style is more reader friendly than most textbooks New to this edition are reflection questions at the end of each chapter This book is appropriate for any course in the undergraduate or graduate teacher education curriculum that is devoted wholly or partly to the study of student motivation
