numbers of people who will be displaced by environmental crises The rise in sea levels alone will account for hundreds of millions of refugees around the globe In *Rising Tides* John R Wennersten and Denise Robbins face the difficult questions that will have to be answered How will people be relocated and settled Is it possible to offer environmental refugees temporary or permanent asylum Will these refugees have any collective rights in the new areas they inhabit And lastly who will pay the costs of all the affected countries during the process of resettlement Offering an essential continent by continent look at these dangers *Rising Tides* is a passionately argued well documented wake up call on the dire current and undeniable human fallout from climate change Looking behind the headlines it connects the dots in a way that will inform and should alarm us all Eugene L Meyer author of *Five for Freedom* This chilling and urgent call to action spares no detail in its mission to present the facts on a looming humanitarian disaster Climate change warning messages too often focus on the environment without going into specifics of how humans will be hurt by global warming *Rising Tides* singlehandedly rectifies this issue Foreword Reviews A must read for policymakers and those in positions of power especially the ones who remain in a state of denial about climate change and refuse to do enough to address the crisis *The Hindu*
