you that you want to be How a special shape can build a stronger confident you How a picture helps let go of negative memories and experiences How a moving image can break bad habits you want to get rid of and much much more Even if you're socially awkward and have no understanding of the human mind whatsoever the expert research behind this guide can ensure that you'll develop enhanced communication skills the power to program your own psyche and the ability to recognize immediately how someone thinks and feels So if you're ready to unleash your potential as a master of human analysis and acquire the skills of the world's most excellent individuals then you should read this book **Nlp** Shlomo Vaknin C

Ht,2020-08-22 Once a loser always a loser we say He's a mule that cannot be reasoned with That's just the way he is we complain We file ourselves and others into categories seemingly cast in stone and resign ourselves to navigating life at the mercy of the cards that have been dealt to us But what if this need not be the case What if we were to see ourselves and others not as immovable islands in the oceans of circumstances but rather as ships with sails hoisted high able to move and choose freely in the face of life's currents and winds The fact of the matter is that behaviors that have been learned can be unlearned Ways of thinking that have become normal and practically automatic can be redefined Our capacity for adaptation is worth bearing in mind As a result of acknowledging the ways in which our brains and bodies either help or hinder us in a variety of contexts we are empowered to adopt strategies that move us ever closer to the very tangible realities of contentment and accomplishment That is the purpose of this book to understand the various rules or Meta Programs which govern neurological and physiological interaction and the resultant impact on our thoughts feelings and actions and to better learn how to make intentional choices that facilitate the healthy and constructive aspects of these interactions and impacts Imagine if you would two towns that are separated by an insurmountable mountain Interaction and communication between them is totally cut off If one town represents the brain and nervous system and the other town the thinking processes perceptions and behavior then Meta Programs would act as a tunnel engineered to cut through the mountain linking the two and facilitating the flow of information between them The Meta Programs determine our tendency to make a decision in a certain frame of thinking That's quite a vague statement isn't it Let's see For example if you tend to look how things match each other it will be easier to persuade you to buy a new car if the salesman shows you how the shape of the car helps to quiet the engine noise and how the automatic gear shifts smoothly with your style of driving and how the price of the car can be divided into installments that match your existing financial capabilities perfectly But if you tend to find the mismatch or the things that are in conflict the salesman would have to constantly compare the car you look at with a less attractive car and show you the differences and how the car you're looking at is much better he'll show you the difference in price the mileage in the city the safety features etc but always in comparison to another car one which you didn't even consider buying Being mindful of the Meta Programs helps us understand and appreciate the differences in the ways that people behave with and respond to the world around them Rather than seeing these differences as obstacles or irritations an understanding of

Meta Programs empowers us to adapt our own behaviors and responses in ways that match and complement their own Meta Programs are therefore useful in overcoming division and misunderstanding and in facilitating synergy and co operation Teachers could use Meta Programs to more effectively keep their students engaged Police officers could use them to better facilitate the diffusion of high stress situations Meta Programs would benefit parents who need to discipline their kids and who are trying to motivate the behavior that they desire The list is practically endless
