NMR of Macromolecules Gordon C. K. Roberts, 1993-07-15 Following the enormous increase in the use of nuclear magnetic resonance to study the conformations and interactions of biological macromolecules this book provides detailed guidance on how to choose the most appropriate protocol to obtain the required information how to carry out the experiment and how to analyse the resulting spectra **NMR of Macromolecules** ... ROBERTS, 1993 List of contributors Nomenclature and abbreviations Introduction Sample preparation Instrumentation and pulse sequences Resonance assignment strategies for small proteins Stable isotope labelling and resonance assignments in larger proteins Effects of chemical exchange on NMR spectra NMR studies of protein ligand interactions NMR of nucleic acids from spectrum to structure H NMR studies of oligosaccharides structure determination from NMR data I analysis of NMR data Structure determination from NMR data II computational approaches Appendix Index [Encyclopedia of Spectroscopy and Spectrometry](#) , 2010-04-09 The Second Edition of the Encyclopedia of Spectroscopy and Spectrometry pulls key information into a single source for quick access to answers and or in depth examination of topics SPEC 2 covers theory methods and applications for researchers students and professionals combining proven techniques and new insights for comprehensive coverage of the field The content is available in print and online via ScienceDirect the latter of which offers optimal flexibility accessibility and usability through anytime anywhere access for multiple users and superior search functionality No other work gives analytical and physical bio chemists such unprecedented access to the literature With 30% new content SPEC 2 maintains the authoritative balanced coverage of the original work while also breaking new ground in spectroscopic research Incorporates more than 150 color figures 5 000 references and 300 articles 30% of which are new for a thorough examination of the field Highlights new research and promotes innovation in applied areas ranging from food science and forensics to biomedicine and health Features a new co editor David Koppenaal of Pacific Northwest National Laboratory Washington USA whose work in atomic mass spectrometry has been recognized internationally **Protein'Protein**

Interactions Haian Fu, 2008-02-03 As the mysteries stored in our DNA have been more completely revealed scientists have begun to face the extraordinary challenge of unraveling the intricate network of protein protein interactions established by that DNA framework It is increasingly clear that proteins continuously interact with one another in a highly regulated fashion to determine cell fate such as proliferation differentiation or death These protein protein interactions enable and exert stringent control over DNA replication RNA transcription protein translation macromolecular assembly and degradation and signal transduction essentially all cellular functions involve protein protein interactions Thus protein protein interactions are fundamental for normal physiology in all organisms Alteration of critical protein protein interactions is thought to be involved in the development of many diseases such as neurodegenerative disorders cancers and infectious diseases Therefore examination of when and how protein protein interactions occur and how they are controlled is essential for understanding

diverse biological processes as well as for elucidating the molecular basis of diseases and identifying potential targets for therapeutic interventions Over the years many innovative biochemical biophysical genetic and computational approaches have been developed to detect and analyze protein interactions This multitude of techniques is mandated by the diversity of physical and chemical properties of proteins and the sensitivity of protein protein interactions to cellular conditions Biotechnology Annual Review M.R. El-Gewely, 1995-11-14 The Biotechnology Annual Review covers the various developments in biotechnology in the form of comprehensive illustrated and well referenced reviews With the expansion of the field of biotechnology coupled with the vast increase in the number of new journals reporting recent results in this field the need for a publication that is continuously providing reviews is urgent Hence each volume of the Biotechnology Annual Review will have a number of reviews covering different aspects of biotechnology Reviewed topics will include biotechnology applications in medicine agriculture marine biology industry bioremediation and the environment Fundamental problems dealing with enhancing the technical knowledge encountering biotechnology utilization regardless of the field of application will be particularly emphasized This series will help both students and teachers researchers as well as administrators to remain knowledgeable on all relevant issues in biotechnology Proposals for contributions and or suggestions for topics for future volumes in this series should be sent to the Editor professor M R El Gewely Department of Biotechnology University of Tromsø IMB MH Bygget N 9037 Tromsø Norway Tel 47 77 644000 Fax 47 77 645350
