Handbook of Group Decision and

Negotiation D. Marc Kilgour, Colin Eden, 2010-08-02 Publication of the Handbook of Group Decision and Negotiation marks a milestone in the evolution of the group decision and negotiation GDN field. On this occasion editors Colin Eden and Marc Kilgour asked me to write a brief history of the field to provide background and context for the volume. They said that I am in a good position to do so. Actively involved in creating the GDN Section and serving as its chair, founding and leading the GDN journal Group Decision and Negotiation as editor in chief and the book series Advances in Group Decision and Negotiation as editor and serving as general chair of the GDN annual meetings, I accepted their invitation to write a brief history. In 1989 what is now the Institute for Operations Research and the Management Sciences (INFORMS) established its Section on Group Decision and Negotiation. The journal Group Decision and Negotiation was founded in 1992, published by Springer in cooperation with INFORMS and the GDN Section. In 2003, as an extension of the journal, the Springer book series Advances in Group Decision and Negotiation was inaugurated.

Veto Bargaining Charles M. Cameron, 2000-06-19 Combining game theory with unprecedented data, this book analyzes how divided party Presidents use threats and vetoes to wrest policy concessions from a hostile congress.

Bilateral Bargaining Stefan Napel, 2012-12-06 This book investigates bargaining between two agents. Its objective is to present, to extend, and to apply the present state of theoretical knowledge. A wide range of questions will be considered. First of all, will two parties reach efficient agreements? Traditional economic theory gives a generally affirmative answer for perfectly rational agents who can carry out complex calculations instantaneously and without cost. The book uses innovative methods to analyse the implications of less demanding assumptions. A practical question related to bargaining is: How much power does the design of institutions such as the UN Security Council give to each of its members? Formally, non-permanent members' votes are necessary to pass resolutions, but theoretical investigation of pre-voting negotiation attributes all power to the five permanent members. Or one may ask whether a society should rather finance the education in higher mathematics for a talented person than remedial training for a retarded person. Different concepts of justice yield different answers. Which particular concept is implemented in a given society is also a matter of bargaining, and it is of special philosophical interest to investigate which bargain will be struck in an ideal society in which individual talents and resources are not yet known. Very generally, a bilateral bargaining situation is characterized by two agents: individuals, firms, governments, etc.

The Journal of Legal Studies, 1991 *Game Theory* Steven N. Durlauf, Lawrence E. Blume, 2009-11-12 Following the recent publication of the award-winning and much acclaimed The New Palgrave Dictionary of Economics, second edition, which brings together Nobel Prize winners and the brightest young scholars to survey the discipline, we are pleased to announce The New Palgrave Economics Collection. Due to demand from the economics community, these books address key subject areas within the field.
