**Our Physical World** Elliot Rowland Downing,2015-07-01 Excerpt from Our Physical World A Source Book of Physical Nature Study Never before in this country has there been so insistent a demand for a more thorough and more comprehensive system of instruction in practical science Forced by recent events to compare our education with that of other nations we have suddenly become aware of our negligence in this matter Industrial and educational experts and commissions are united in demanding a change While on the whole there has been a steady increase in the amount of time given to science work in the secondary and elementary schools the attention paid to it especially in the elementary schools has been somewhat spasmodic and its administration has been more or less chaotic This is not due to lack of interest on the part of school officials but to their dissatisfaction with the methods of instruction employed There is no doubt that superintendents would gladly introduce more science if they felt sure that the educational results would be commensurate with the time expended This is indicated by a recent survey of about one hundred and fifty cities in seven states of the Central West The survey shows that two thirds of them have nature study in the elementary schools and that all are requiring some science for graduation from the high school The average high school is offering three years of science Since 1890 there has been a greater increase in the percentage of students enrolled in science in the high schools than in any other subject and the present enrolment in science is greater than in any other subject Moreover greater attention is now being paid to the training of teachers in methods of presentation of science About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
