

## SCOOTER OWNERS MANUAL

### Safety warning:

For your safety we recommend that you read the entire manual before assembling or using this scooter. Mod:lite also recommends periodically reviewing of the information in the manual with any younger rider who may use this scooter.

### Before you ride:

It is good practice to check your scooter before you ride. Younger riders may need assistance. (see maintenance and assembly sections)

- Replace all worn parts on your scooter immediately. Riding with worn parts can be hazardous for both the user and scooter.
- Mod:lite scooters have been designed to a high standard. Only replace worn parts with genuine Mod:lite scooter spares and accessories. Consuming your scooter with other non Mod:lite accessories will invalidate any warranty.
- Always wear proper protection equipment such as a helmet, knee and elbow pads, making sure they are adjusted to fit securely. Some accessories will require appropriate safety equipment to be worn for safety to be granted so it is good practice to wear it at all times.
- Always wear appropriate foot wear. Never try riding without shoes or in loose footwear. Never wear sandals and always keep shoe laces secure and away from moving parts.
- Bolts, nuts and washers and parts can wear over time, so check your scooter every time you ride. Scratching can be dangerous, so use this scooter at your own risk and always of use with common sense.

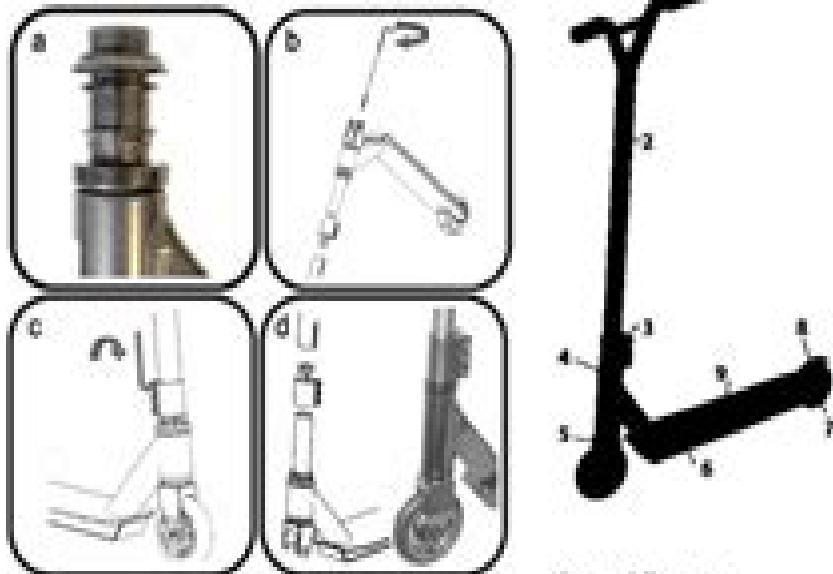

Under all circumstances use your scooter in the wet. Wheel and headset bearings will seize, the grip tape will start to peel or fall off and the scooter may fail. No part becomes new that has been used in wet or damp conditions is applicable to any warranty or replacement.

### Safe riding:

- Always look up when riding and keep both hands on the handlebars at all times.
- Before riding make sure the scooter fork is facing forward.
- Only ride on smooth flat surfaces away from roads and motor vehicles, avoiding drainage grates and sudden surface changes. Failure to do this may result in the scooter stopping suddenly.
- Be aware of your surroundings. Watch out for pedestrians, animals, trees and other riders etc.
- Avoid surfaces with water, wet leaves, sand, ice and loose stones or grit on them.
- Never use your scooter on grass or in the mud.
- Never ride with a motorised device.
- Always leave enough room to stop. Be aware that different conditions and surfaces will alter your stopping distance.
- Never use one of the brakes with flat spot wheels, as avoid breaking excessively for long periods of time. The brake can also become hot after use so do not touch this with your bare hands.
- Remember to be aware of other riders when riding. It is also polite to practice "scooter etiquette" when at traffic lights to avoid any collisions with other riders. Take it in turns and don't race into stopping in as this is dangerous and not polite!
- Take riding will damage the scooter faster as no one ever lands his or her first trick without breaking it a few times. Advanced riders will wear more parts than most - fast!
- This scooter is designed to the highest manufacturing standards and is extremely durable, however parts in time will wear and are not impervious to damage. Regular maintenance will prolong the scooter life.

### Scooter Parts:

#### Step 1:

To assemble your new scooter first unpack all components ensuring all small parts are kept safe. Then remove the front wheel from the fork using two allen keys.

Step 2: Slide the fork into the headset from the bottom. (See photo) Headset wedge on top of the fork, then install spacer washer and then headset top cap. (ref image 'a')

Step 3: Place the handle bars over your forks and fit your scooter upside down. Tighten and align the M8 (10mm) bolt that goes from the bottom of your forks into a central wheel as pre-welded from your bars. (ref image 'b')

Step 4: As the 10mm bolt becomes tighter align your front wheel so that it is facing forwards with your bars.

Note image 'd' shows the internal section of your scooter. It shows the Fork, Clamp, Stemnut and Bars.

Please check all bolts are tight before use and also recheck regularly. Please read the general maintenance section of this manual.

### Changing your wheels or Bearings:

2. Knock out the bearing carefully from the middle using an allen key or punch and a hammer.
3. Knock the spacer from the middle safe.
4. Press one of the bearings into your wheel you may need to use a vice to keep it square or tap gently with a rubber hammer.
5. Insert the wheel spacer, ensuring it remains in an upright position.
6. Press in your second bearing and reassemble back onto the scooter.
