Media, AI, Algorithms, and the Future of Media Dr Hemant Kumar, Dr. Prabhat Dixit, 2026-01-09 Journalism and content creation are undergoing a profound transformation driven by Artificial Intelligence reshaping not only tools but also workflows, ethics, and professional roles. Traditional markers of skill such as speed or language proficiency no longer define success. AI now influences all four pillars of news creation: distribution, verification, and consumption, while modern journalists function as multi-skilled professionals combining reporting with data analysis, OSINT, visual storytelling, and digital forensics. The book examines how AI supports research, transcription, investigations, visuals, and audience analysis, while also raising critical concerns about creativity, bias, deepfakes, editorial control, and credibility. Taking a balanced approach, it presents AI as a potential editorial partner when used responsibly. With real newsroom use cases, policy insights, and an Indian context, the book aims to replace fear of AI with informed confidence and ethical leadership in journalism.
