It then moves on to present ideas and initiatives to address these problems, tackling the subject through four sections: Assuring Quality, questioning what quality assurance means and how it might be practised; Identifying Quality, examining what knowledge exists at present and how it might be further researched; Developing Quality, investigating the development of staff through teacher training and appraisal; Case Studies of Quality Assurance, reviewing six case studies of quality assurance in a range of contrasting subjects including the professional subjects of Medicine, Nursing and Teacher Training, which are also addressed systemically in the first section.
