*Wynn-Williams New Book 2025* Sarah Press,2025-03-19 Once hailed as a revolution in human connection Silicon Valley s most powerful companies promised to build a better world But behind the sleek interfaces and lofty mission statements lay a different reality one driven by profit power and a troubling disregard for ethics *Careless People* takes readers deep inside this world offering a firsthand account of what happens when idealism collides with corporate ambition Sarah Wynn Williams a former insider at Facebook reveals the inner workings of a company that started with the dream of connecting the world but became entangled in controversy deception and unchecked influence From the excitement of joining a tech giant to the sobering realization of its moral compromises she unpacks the tensions between innovation and accountability the internal struggles over misinformation and political manipulation and the growing chasm between public promises and private actions With unparalleled insight *Careless People* explores the unchecked power of Big Tech the ethical dilemmas faced by its employees and the consequences of a digital landscape shaped by corporate greed As governments and societies grapple with the fallout of this technological era this book serves as both an expos and a warning an urgent call for greater transparency responsibility and reform in an industry that shapes the modern world **Shadow Scores** Naim Tahir

Baig,2025-11 BOOK DESCRIPTION *Shadow Scores* How Western Democracies Are Quietly Building Social Credit Empires Beyond China s Shadow While the West recoils at China s Social Credit System a parallel empire of algorithmic surveillance has emerged in liberal democracies hidden in plain sight marketed as efficiency and silently reshaping the foundations of freedom itself In *Shadow Scores* investigative journalist Dr Naim Tahir Baig exposes how the United States Europe and India have constructed sophisticated social credit architectures that rival and in some ways exceed the systems they publicly condemn From Uber drivers deactivated by opaque algorithms to welfare recipients flagged as fraudulent by AI from predictive policing tools that amplify racial bias to biometric systems that deny food to the hungry this groundbreaking work reveals the creeping authoritarianism hiding behind the facade of technological progress Drawing on over 100 verified sources including court documents policy analyses and interviews with more than 50 affected individuals Baig meticulously documents how gig economy platforms have become unelected governors how Europe s data protection laws contain dangerous blind spots and how India s massive Aadhaar biometric system has created a digital caste hierarchy He traces the

evolution from 19th century credit ledgers to today's all encompassing behavioral scores revealing how Big Tech's lobbying has systematically weakened regulations designed to protect citizens from algorithmic tyranny But *Shadow Scores* is more than an exposé it's a call to action Through vivid case studies of real people trapped in algorithmic poverty cycles denied justice by biased risk assessments and stripped of privacy by surveillance capitalism Baig illustrates the profound human cost of allowing private corporations to wield governmental power without accountability He challenges the techno-orientalist narrative that frames China as uniquely dystopian while Western democracies quietly deploy similar tools under the guise of efficiency and innovation This urgent accessible investigation draws disturbing parallels between science fiction warnings and present day reality documenting how the invisible ledger of trust maintained by platforms like Uber Airbnb and DoorDash enforced by welfare fraud detection algorithms and legitimized by inadequate regulation is fundamentally reshaping democracy itself As artificial intelligence becomes increasingly embedded in decisions about employment criminal justice housing and social services the question is no longer whether algorithmic governance will define our future but whether we will reclaim democratic control before it's too late *Shadow Scores* offers both a wake up call and a roadmap for resistance highlighting successful legal challenges worker organizing efforts and policy frameworks that could restore human dignity in an age of machine judgment Essential reading for anyone concerned about privacy inequality racial justice labor rights or the future of democracy in the digital age this book reveals that the greatest threat to freedom may not come from authoritarian regimes abroad but from the algorithmic empires we're building at home one score at a time [Obey Or Die](#) James R Donovan, 2025-04-14 What if your app turned against you What if the world watched you break In *Drop the 2025* breakout thriller that shook SXSW and dominated Reddit one woman is forced to battle a digital force that knows her better than she knows herself But this book isn't just about what happened onscreen it's about what it means off screen Inside This Must Read Review Book A psychological deep dive into Violet Gates mother weapon survivor The dark genius of *DigiDrop* is the app just code or something more How Christopher Landon turned paranoia into pulse pounding cinema Hidden Easter eggs Reddit theories and the questions no one's asking An interactive quiz Would you survive the app Written with film lover's heart and a critic's eye *Drop The Movie Breakdown* is for cinephiles tech skeptics and anyone brave enough to ask What is your data really worth Perfect For Fans Of *Black Mirror* Searching Cam The Circle Happy Death Day Also Great For Film students screenwriters tech ethicists and anyone afraid of the Accept All Cookies button *Brené Brown New Book 2025* JANET.
