Memes Today Update:

Meme Media and Meme Market Architectures Yuzuru Tanaka, 2003-07-10 This book provides an integrated view of the five kinds of enabling technologies in terms of knowledge media architectures multimedia and hypermedia object oriented GUI and visual programming reusable component software and component integration network publishing and electronic commerce and object oriented and multimedia databases Among many books on multimedia and hypermedia few address knowledge Of those that do none focus on media for the editing distribution and management of knowledge the way this book does It is written based on the hypothesis that knowledge media work as genes with their network publishing repository working as a gene pool to accelerate the evolution of knowledge shared in our societies [The Electric Meme](#)

Robert Aunger, 2013-07-30 From biology to culture to the new new economy the buzzword on everyone's lips is meme How do animals learn things How does human culture evolve How does viral marketing work The answer to these disparate questions and even to what is the nature of thought itself is simply the meme For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves But no one has so far been able to define what they are Until now Here for the first time Robert Aunger outlines what a meme physically is how memes originated how they developed and how they have made our brains into their survival systems They are thoughts They are parasites They are in control A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium Memes have found ways to leap from one brain to another A number of them are being replicated in your brain as you read this paragraph In 1976 the biologist Richard Dawkins suggested that all animals including humans are puppets and that genes hold the strings That is we are robots serving as life support for the genes that control us And all they want to do is replicate themselves But then we do lots of things that don't seem to help genes replicate We decide not to have children we waste our time doing dangerous things like mountain climbing or boring things like reading or stupid things like smoking that don't seem to help genes get copied into the next generation We do all sorts of cultural things for reasons that don't seem to have anything to do with genes Fashions in sports books clothes ideas politics lifestyles come and go and give our lives meaning so how can we be gene robots Dawkins recognized that something else was going on We communicate with one another and we get ideas and these ideas seem to have a life of their own Maybe there was something called memes that were like thought genes Maybe our bodies were gene robots and our minds were meme robots That would mean that what we think is not the result of our own creativity but rather the result of the evolutionary flow of memes as they wash through us What is the biological reality of an idea with a life of its own What is a thought gene It's a meme And no one before Robert Aunger has established what it physically must be This elegant paradigm shifting analysis identifies how memes replicate in our brains how they evolved and how they use artifacts like books and photographs and advertisements to get from one brain to another Destined to inflame arguments about free will open doors to new ways of sharing our thoughts

and provide a revolutionary explanation of consciousness The Electric Meme will change the way each of us thinks about our minds our cultures and our daily choices *Exploring the Sociopragmatics of Online Humor* Villy Tsakona, 2024-07-15 This monograph explores the diverse sociopragmatic functions and meanings of humorous discourse in various online contexts affecting its use To this end an analytical model is proposed which takes into consideration the aspects of context which are relevant to the production and reception of humor and hence to its sociopragmatic analysis The model is employed for addressing research questions such as the following Why may an utterance text be intended and perceived as humorous by some speakers and fail for others How and why may speakers attempt to regulate language use through humor Why and how may the same humorous utterance text engender diverse and contradictory interpretations How do speakers create social groups and project social identities through humor How could the sociopragmatic analysis of humor form the basis for teaching about humor within a critical literacy framework Bioinformatics Research and Applications Ion Mandoiu, Alexander Zelikovsky, 2007-08-06 This book constitutes the refereed proceedings of the Third International Symposium on Bioinformatics Research and Applications ISBRA 2007 held in Atlanta GA USA in May 2007 The 55 revised full papers presented together with three invited talks cover a wide range of topics including clustering and classification gene expression analysis gene networks genome analysis motif finding pathways protein structure prediction protein domain interactions phylogenetics and software tools *Get More Fans: The DIY Guide to the New Music Business* Jesse Cannon, Todd Thomas, 2012-11-25 How Do I Promote My Music On A Small Budget How Do I Get My YouTube Videos to Spread How Do I Turn Casual Fans Into One s Who Buy From Me How Do I Get Written About On Blogs How Do I Increase Turnout At Shows How Do I Make Fans Using Facebook Twitter Tumblr And SoundCloud With every day that passes the power the major labels once had dies a little more The chance to get the same exposure as your favorite musicians gets easier and easier The hurdles that would only allow you to get popular if the right people said your music was good enough are gone You can now get exposed to thousands of potential fans without investing 1% of what musicians used to by building a fanbase based on listeners love for your music No more writing letters hoping that A R writes you back This book explains how you do it While many books will tell you obvious information legal mumbo jumbo and marketing catchphrases that don t help you get more fans Our experience working with real bands from upstarts like Man Overboard and Transit to legends like The Cure The Misfits and Animal Collective has led us to understand the insider tricks and ideas that go into some of the most important groups of our time We produce records do licensing deals negotiate record contracts and get the musicians we work with written about on websites like Pitchfork and Vice We have worked with bands who started off as nothing and became something Unlike any other book written on the subject we have compiled the knowledge no one else has been willing to print in fear of obsoleting their own career We give you thousands of ideas on how to get people to hear your music and turn them into fans who pay to support your music Whether you are a label owner musician manager booking agent or
