

# Micro vs. Macro Economics Simplified

Microeconomics studies choices made by individuals, households, and firms.

It's about supply and demand.

## - MicroEconomics -

**Consumer Choice**  
how individuals make decisions about what to buy and consume

**Behavioral Economics**  
how psychological factors influence economic decision-making

**Market Power**  
ability of an individual entity to control the market price of a product or service

**Game Theory**  
how individuals or firms make decisions when they interact with others

Macroeconomics examines broader economic forces like inflation, unemployment, GDP growth, and monetary policy.

## - MacroEconomics -

**Business Cycles**  
periodic fluctuations in economic activity, like growth and recession

**Monetary policy**  
Managing money supply using interest rates to influence the economy

**Fiscal Policy**  
use of government spending and taxes to manage the economy

**International Trade**  
exchange of goods and services between different countries

While microeconomics and macroeconomics are different, they are interdependent and complement each other.
