Open AI and Computational Intelligence for Society 5.0 Pandey, Rajiv, Srivastava, Nidhi, Prasad, Rajesh, Prasad, Jayashree, Garcia, Manuel B., 2024-11-29 As technology rapidly advances, the complexity of societal challenges grows, necessitating intelligent solutions that can adapt and evolve. However, developing such solutions requires a deep understanding of computational intelligence (CI) and its application in addressing real-world problems. Moreover, ethical considerations surrounding AI, such as bias and accountability, are crucial to ensure responsible development and deployment of intelligent systems. *Open AI and Computational Intelligence for Society 5.0* offers a comprehensive exploration of CI, providing insights into intelligent systems theory, design, and application. This book is a practical guide for scientists, engineers, and researchers seeking to develop thoughtful solutions for complex societal issues. Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines that collaborate with humans to enhance problem solving and improve the quality of life.

[Innovation Promotion Policies and Institutional Reform in China](#) Kai Kajitani, 2024-08-05 This book focuses on the political economy behind innovation in China's new industrial sectors, particularly the effects of policies and government regulation in the absence of the rule of law. In its analysis, the book aims to elucidate the mechanisms that generate innovation from multiple perspectives while utilizing insights from political science and law. The analysis in this book focuses on the following three points: First, by examining Guizhou Province's Big data industry promotion policy, import substitution digitization policy, and government intellectual property strategy, we seek to empirically clarify the extent to which Chinese government industrial policy has stimulated innovation. Next, we examine in detail the issues surrounding the rule of law in China regarding introducing anti-monopoly laws for digital platform companies and developing the intellectual property court system. Third, it focuses on the role played by local governments in industrial policy, including the impact of industrial guidance funds on the efficiency of the regional financial sector and the impact of local bond issuance on the effectiveness of resource allocation among regions.

Year 2

GenAI Safety and Security Emma,2025-03-08 We are celebrating year 2 after GenAI explosion Still there are many questions on the table for what would be next for the future of GenAI and humanity Nobody would what is next When Trump won the President 2025 that future would be more unknown than ever with a trade war and AI race However between no regulation and bad regulations obviously we are much better without regulations The reality is regulation only work out for the good guys trying to follow the rules while the bad guys will do whatever regardless regulation My story started a year ago A day I lost an entire access to everything that I have built for three years since a pandemic with questions about the first chapter of human and genAI The book is a whole story of my second year with GenAI explosion I will walk you through the most controversy period of 2024 known as the big election When Donald J Trump known for several accusation for his first term and previous past won the second term non consecutive term despite of how media predicted that he will lose the biggest ever cyber security in this history in tech healthcare telecommunication and finance the bottleneck of AI safety and security also the main updates of policies and prevention for the better future of humanity
