**using substructure in abaqus modified version with voice** - Sep 19 2023

this video tutorial shows you how to create substructure in abaqus using substructure could significantly reduce run time in huge problems this video tutorial is subtitled and with

**10 1 2 defining substructures washington university in st louis** - Oct 08 2022

substructures are defined using the substructure generation procedure the substructure creation and usage cannot be included in the same analysis multiple substructures can be generated in an analysis any substructure can consist of one or more other substructures if this is the case the nested level substructures must be defined first

**4 1 substructures in abaqus cae** - Nov 09 2022

description abaqus cae now enables you to create substructures import them into your model database add them to your assembly and recover their data during an analysis the enhancements fall into three categories substructure generation substructure usage and substructure recovery

abaqus 1 a basic introduction youtube - Aug 06 2022

aug 15 2017 446k views 6 years ago this is a basic introduction for structural fem modelling using the popular software abaqus in this video the basics are covered including creating and analyzing a three

**using substructures massachusetts institute of technology** - Jul 17 2023

substructures are collections of elements from which the internal degrees of freedom have been eliminated retained nodes and degrees of freedom are those that will be recognized externally at the usage level when the substructure is used in an analysis and they are defined during generation of the substructure

generating a substructure massachusetts institute of technology - May 15 2023

generating a substructure a single analysis can include multiple substructure generate steps and abaqus cae creates corresponding output database files for each step multiple preloading steps can precede every substructure generation step in your analysis

*using substructures in abaqus youtube* - Jun 16 2023

this example shows you how to create a substructure and use it four times in the model as a leg support for storage vessel

**generating substructures massachusetts institute of technology** - Aug 18 2023

a substructure database is the set of files that describe the mechanical and geometrical properties of a substructure and abaqus writes all substructure data to the substructure database during the substructure generation analysis

*substructure generation in abaqus imechanica* - Mar 01 2022

dec 17 2013 i have created a substructure in abaqus as output i will like to see the substructure matrices mass stiffness and damping matrices however i m only able to write the mass and stiffness matrices to an output file mtx does anyone know how to create an output file including both the mass stiffness and damping matrices of the substructure

**substructuring and substructure analysis massachusetts** - Feb 12 2023

the basic substructuring idea is to consider a substructure a part of the model separately and eliminate all but the degrees of freedom needed to connect this part to the rest of the model so that the substructure appears in the model as a substructure a collection of finite elements whose response is defined by the stiffness and mass o

**using substructures virginia tech** - Dec 10 2022

substructures are collections of elements from which the internal degrees of freedom have been eliminated retained nodes and degrees of freedom are those that are recognized externally at the usage level when the substructure is used in an analysis and they are defined during generation of the substructure

contact modeling if substructures are present - Jan 31 2022

limitations of structural elements membrane elements cannot be used to overlay a substructure that consists of second order three dimensional brick elements of type c3d20 r h if the substructure will be used as a slave surface normally abaqus standard automatically converts c3d20 r h brick elements to elements with midface nodes c3d27 r h because this

*2 14 1 substructuring and substructure analysis* - Apr 14 2023

in abaqus standard the response within a substructure once it has been reduced to a substructure is considered to be a linear perturbation about the state of the substructure at the time it is made into a substructure

**substructure generate massachusetts institute of** - Apr 02 2022

set this parameter equal to yes default if the substructure eigenproblem needs to be solved during substructure generation in abaqus substructure eigenvectors can be used to define substructure modal damping for a given substructure abaqus standard will evaluate the stiffness associated with frequency dependent springs and dashpots at

*1 16 1 analysis of a frame using substructures* - Mar 13 2023

the purpose of this example is to provide basic demonstration and verification of the substructuring capabilities in abaqus problem description the example is a frame consisting of two columns connected by a beam figure 1 16 1 1 the columns and the beam are each modeled with 10 elements of type b21 once a substructure has been
