Read the passage below and answer the questions on the next page.

TikTok is a video-sharing app that has become incredibly popular among young people around the world. But what is TikTok, and where did it come from?

TikTok was launched in China in 2016 under the name Douyin. It was created by the Chinese tech company ByteDance, which saw an opportunity to capitalize on the growing popularity of short-form video content. The app quickly became a hit in China, and ByteDance decided to launch it globally under the name TikTok in 2018.

TikTok allows users to create short videos, usually between 15 and 60 seconds long, that can be set to music or other audio. Users can add effects, filters, and other creative elements to their videos to make them more engaging. The app also features a "For You" page that curates content based on each user's viewing history and preferences, making it easy to discover new and interesting content.

So why is TikTok so popular? There are several reasons. For one, it provides a fun and easy way to create and share content. The app is designed to be user-friendly, and its features make it easy to create professional-looking videos without a lot of technical skill. Additionally, TikTok is a platform that encourages creativity and self-expression, allowing users to showcase their talents and connect with others who share their interests.

TikTok has become popular due to its ability to create viral trends and challenges, which often involve popular songs or dances and can quickly spread across the platform.

Humanism in the Modern World Jeff Radwell, 2025-02-27 In an era of misinformation digital spectacle and declining literacy this book examines the historical resilience of humanism and the challenges it faces in the modern world From the Renaissance scholars who revived intellectual inquiry to the revolutionary salons labor halls and universities that fostered debate and dissent humanist thought has always thrived in moments of resistance But today new forces algorithmic manipulation social media driven self worth and the dominance of visual culture threaten to erode the very foundations of reason autonomy and personal dignity This book explores how humanist values have historically been challenged and how they prevailed offering a comparative analysis between past intellectual struggles and today's crises of thought and identity It delves into how the digital age while democratizing information has also fragmented attention heightened social comparison and replaced depth with spectacle The decline of reading culture the rise of aestheticized self worth and the transformation of universities into elite corporatized institutions have all contributed to an environment where critical thinking is devalued history is flattened and intellectual engagement is increasingly passive Yet as history shows humanist resistance adapts This book does not merely diagnose the problem it seeks solutions exploring how modern intellectuals digital creators and educators can reclaim humanism for a new age From rethinking the role of universities to fostering meaningful discourse in digital spaces it argues that humanism must evolve without surrender
