**The Dialectic of Digital Culture** David Arditi,Jennifer Miller,2019-08-01 This edited collection analyzes the role of digital technology in contemporary society dialectically While many authors journalists and commentators have argued that the internet and digital technologies will bring us democracy equality and freedom digital culture often results in loss of privacy misinformation and exploitation This collection challenges celebratory readings of digital technology by suggesting

digital culture's potential is limited because of its fundamental relationship to oppressive social forces. The Dialectic of Digital Culture explores ways the digital realm challenges and reproduces power. The contributors provide innovative case studies of various phenomena including #MeToo, Etsy, mommy blogs, music streaming, sustainability, and net neutrality to reveal the reproduction of neoliberal cultural logics. In seemingly transformative digital spaces, these essays provide dialectical readings that challenge dominant narratives about technology and study specific aspects of digital culture that are often underexplored. **FinTech Mergers And Acquisitions. Specifics And Issues** Adriana Maslinkova, 2020-08-13 Master's Thesis from the year 2019 in the subject Law Civil Private Trade Anti Trust Law Business Law grade A5 University of Glasgow language English abstract Although many studies focus on different aspects of mergers and acquisitions, very few studies concentrate on new technology industries. Such is also the case with FinTechs. This paper explores the FinTech mergers and acquisitions as they do not possess the common features of ordinary corporate transactions. This paper will address the specifics of FinTech deals and the particular issues which may arise both for the buyers and sellers. The growth trends of high importance for FinTechs globally during 2018 with developed and unicorn FinTechs rising building international partnerships and making their own acquisitions to drive global expansion activities. Mergers and acquisitions specifics and structures include questions of buying and selling these types of businesses as well as the more practical questions of due diligence and compliance checks of this so highly regulated requiring and integrating FinTech business requires an understanding of the target company's estimate proposition at the initial level as well as possibly securing regulatory approval for the transaction. One of the most puzzling issues explored is the valuation of these businesses in particular crypto assets and FinTech specific methods used. Analysis of market dynamics is vital for this valuation which includes factors such as market size, potential market value, growth prospects, existing competitors and potential income to be derived for their particular technology. Financially, substantive merger control analysis in the FinTech sector should be done but can be complex since traditionally used factors as market shares and market definition can fail to include FinTech market structures. The results indicate that Fintech is playing the key roles in the continuous economic development. The growth trends of high importance for FinTechs globally during the past years with developed companies and unicorn FinTechs rising building international partnerships through M&A and making their own acquisitions to drive global expansion activities. In order for the conventional businesses to coexist with Fintech, they need to be flexible and rapidly adapting with new technology. This has become the main goal of the financial institutions in the digital age. In fact, it is compulsory for the businesses to innovate themselves in order to boost their competitiveness. In the regulated FinTech M&A has become sound base for long-term development.
