The Design of Digital Democracy Gianluca Sgueo,2023-08-11

Ever stronger ties between technology entertainment and design are transforming our relationship with democratic decision making When we are online or when we use digital products and services we tend to focus more on certain factors like speed of service and user friendliness and to overlook the costs both for ourselves and others As a result a widening gap separates our expectations of everything related to digitalization including government and the actual practice of democratic governance Democratic regulators unable to meet citizens demands for tangible fast and gratifying returns are seeing the poorest results ever recorded in terms of interest engagement and retention despite using the most cutting edge technologies This book explores various aspects of the relationship between democracy technology and entertainment These include on the one hand the role that digital technology has in strengthening our collective intelligence nurturing empathic relations between citizens and democratic institutions and supporting processes of political aggregation deliberation and collaboration On the other hand they comprise the challenges accompanying digital technology for representation transparency and inclusivity in democratic decision making The book's main argument is that digital democratic spaces should be redesigned to narrow the gap between the expectations and outcomes of democratic decision making It suggests abandoning the notion of digital participatory rights as being fast and easy to enjoy It also refutes the notion that digital democratic decision making can only be effective when it delivers rapid and successful responses to the issues of the day

regardless of their complexity Ultimately the success or failure of digital democracy will depend on the ability of public regulators to design digital public spaces with a commitment to complexity so as to make them appealing but also effective at engaging citizens

An eye opening panoramic guide providing the economic literacy you need to be in control of your money decisions and get on the path to long term financial independence. We are all on this earth together and so is our money. Bryan Kuderna writes, You must understand that money, your money, rests at the heart of every major issue in the world. Kuderna, a Certified Financial Planner™ and nationally recognized financial advisor, knows first hand that the key to wise financial decisions is a deep understanding of economics. When his clients ask him, What should I do with my money? Kuderna has found the conversation quickly turns from one of personal finance to a 360 degree view of economics, illustrating why and how issues on the global stage and the kitchen table are directly connected. In **What Should I Do with My Money?**, Kuderna explains how economies and markets are affected by the way people live, learn, love, work, play, and pray. For it is these behaviors that determine how groups, corporations, and nations make money or lose money. Using history, storytelling, and sage insights, Kuderna takes you on a panoramic tour of the nine most important domains impacting your wealth: POPULATION, a rapidly growing and shifting balance of givers and takers; ENTITLEMENTS, the past, present, and future of Social Security, Medicare, Medicaid, pensions, and stimulus programs; EDUCATION, costs and benefits of college and student loans; ECONOMIC PHILOSOPHY, political and monetary beliefs that govern our world; ENVIRONMENT, the sustainability of our planet amid global warming, plastics, and finite natural resources; TECH, opportunities and threats from the fastest growing sector of the stock market; WAR, the use of proxy wars, civil, military, fusion, cyber, and economic attacks; RELIGION, how faith has steered economies from the stone age to the space age; PERSONAL FINANCE, a plan to attain the Three I's: Impact, Independence, and Income. Each chapter includes special features explaining the macro problem and what it means to your personal micro world, helping you connect the dots of global issues to your own financial plan. Now more than ever, you might feel overwhelmed, the victim of existing economic structures, but wait and see how there has been no better time for you to take control and build wealth. **Screen Digest**, 2005. **The New York Times Index**, 2009. **The Official Index to the Financial Times**, 2003. **The Wall Street Journal**, 2007. **Whitaker's Books in Print**, 1998. **The Weekly Japan Digest**, Computer Gaming World's Why Won't This #@\\$!
