Access to Knowledge for Consumers Jeremy Malcolm, 2010 Information Program grantee Consumers International has released the results of a global survey designed to expose the obstacles consumers face in gaining access to education and cultural materials The survey was conducted in 13 languages covering 15 000 consumers across 24 countries The survey found that The biggest barriers that consumers face in accessing copyright works are those created by copyright law Even so consumers around the world will choose original copyright works over pirated copies provided that they are available at an affordable price While borrowing from libraries and other cultural institutions provided a viable alternative for some consumers priced out of original copyrighted works the survey found that particularly in developing countries access to libraries is limited and the works they carry are few Although the authors of the survey saw copyleft initiatives like Open Educational Resources and Free and Open Source Software as great ways to help consumers vault access barriers they concluded that governments needed to act to address consumers needs for lower cost original materials to buy borrow and access online The survey forms the first two chapters of Consumers International s new report *Access to Knowledge for Consumers Reports of Campaigns and Research 2008 2010* Publisher description [OECD Internet Economy Outlook 2012](#) OECD, 2012-10-04 Supported by time series data this publication presents an overview of trends and highlights how the Internet sector has proven to be resilient during the recent economic crisis

The Future is Digital Henrique Marinho, What is more difficult Write the synopsis of a book or make it possible to print and sell the physical units of that book Certainly printing and selling is much more complicated since not only books but many of the things we use on a daily basis are becoming digital The predictions are frightening will we live in a future where machines will dominate us as in the dystopian film *Matrix* Will the leading machine be smarter than our current president Really the future is an unknown place the more we think about it the less certainty we have of how it

will actually be but surely the internet will have a fundamental role in your daily life whatever your profession your hobby or activity you dream to accomplish Embark on these reflective texts where the author scans the dependence of human beings on this tool called the internet that dominated our current life Who would have said 30 years ago that phone cards would become museum pieces Would paper maps become something we only see in pirate movies Would queuing up at the bank to pay a simple bill be outdated Anyway there is so much information that does not fit in a simple synopsis get the book read and see **The United States of America** ,1906 **Journal of the Royal Asiatic Society** ,1882 *Emmy* ,2009
