Well-Being and Education: Current

Indications and Emerging Perspectives Eirini Karakasidou, George Tsitsas, Michael Galanakis, 2024-10-16 School apart from being a place of education and transmission of new knowledge should also be a place of personal development and enhancement of students' well-being and mental resilience while protecting mental health and preventing teacher burnout. The current covid 19 pandemic has made the need for psychological support for students and teachers more urgent than ever. The science of positive psychology has offered many tools and methods that are particularly effective in the school environment and in educational contexts in general. New tools, methods, and practices are needed to enhance the well-being and psychological resilience of students, teachers, and parents in a time of challenges such as the current pandemic and inflation that cause stress, uncertainty, and an increase in psychopathology.

Health Promotion in the Universities and Other Educational Settings Miguel Corbí, Antoni Aguiló, Carmen Gallardo Pino, Mario Del Libano, Carlos Emanuel

Rodríguez-Díaz, Hiram V. Arroyo Acevedo, 2025-09-17 The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students, teaching staff, and administrative personnel. The university is a conductive environment for the promotion of healthy habits since firstly it is usually the moment when the students make decisions under their responsibility and secondly it is a place where academic, sports, and social activities take place so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life. Health promotion in universities can cover several areas such as healthy eating, physical exercise, prevention of addictions, emotional and social mental health among others. It can also involve the entire university community from students to administrative and teaching staff. In the case of students, it is essential as it is a period of change and habit formation and the fact that they will be the future decision makers of society.
