performance code while building an application is crucial and over the years Microsoft has focused on delivering various performance related improvements within the .NET ecosystem. This book will help you understand the aspects involved in designing responsive, resilient, and high performance applications with the new version of C and .NET. You will start by understanding the foundation of high performance code and the latest performance related improvements in C 10.0 and .NET 6. Next you'll learn how to use tracing and diagnostics to track down performance issues and the cause of memory leaks. The chapters that follow then show you how to enhance the performance of your networked applications and various ways to improve directory tasks, file tasks, and more. Later you'll go on to improve data querying performance and write responsive user interfaces. You'll also discover how you can use cloud providers such as Microsoft Azure to build scalable, distributed solutions. Finally you'll explore various ways to process code synchronously, asynchronously, and in parallel to reduce the time it takes to process a series of tasks. By the end of this C programming book you'll have the confidence you need to build highly resilient, high performance applications that meet your customer's demands. What you will learn: Use correct types and collections to enhance application performance. Profile, benchmark, and identify performance issues with the codebase. Explore how to best perform queries on LINQ to improve an application's performance. Effectively utilize a number of CPUs and cores through asynchronous programming. Build responsive user interfaces with WinForms, WPF, MAUI, and WinUI. Benchmark ADO.NET, Entity Framework Core, and Dapper for data access. Implement CQRS and event sourcing and build and deploy microservices. Who this book is for: This book is for software engineers, professional software developers, performance engineers, and application profilers looking to improve the speed of their code or take their skills to the next level to gain a competitive advantage. You should be a proficient C programmer who can already put the language to good use and is also comfortable using Microsoft Visual Studio 2022.
