**Circular Migration in Zimbabwe & Contemporary Sub-Saharan Africa** Deborah Helen Potts,2010 The World Bank insists that the urban share of sub Saharan Africa s population is rapidly increasing this study shows that in many countries this is no longer true as migration strategies have adapted in response to economic and political change Circular migration whereby rural migrants do not remain permanently in town has particular significance in the academic literature on development and urbanization in Africa often having negative connotations in southern Africanist studies due to its links with an iniquitous migrant labour system Literature on other African regions often views circular migration more positively This book reviews the current evidence about circular migration and urbanization in sub Saharan Africa The author challenges the dominant view that rural
