Oscar Bait Robert Boucaut, 2025-09-22 The Academy Awards or the Oscars have held a unique position in defining and enacting prestige for film industries and their publics. In evaluating the best of film they wield cultural influence over such cinema practices as consumption and evaluation, filmmaking aesthetics and narratives, and the discursive activity of Hollywood's industrial agents and audiences. Oscar Bait The Academy Awards Cultural Prestige offers a comprehensive insight into how a film or star positions one's self as a viable competitor worthy of such consecration in new media contexts. Based over three years of Oscars seasons 2019-2021, rigorous analysis of film texts, awards telecasts, and circulating discursive media is built through an original scholarly framework for understanding modern cultural awards. Oscar Bait recontextualises the Oscars' complex legacy into a new media ecosystem, one in which their established value is undercut by declining broadcast viewership, the changing values and demands of global film publics, and influential discourses aiming to progress popular culture beyond its problematic histories. In this new paradigm of film production and consumption, Boucaut explores what the Oscars mean in a contemporary filmmaking landscape and what impacts established stereotypes of Oscar worthiness. The colloquial Oscar Bait continues to hold over the awards. Oscar Bait captures a dynamic snapshot of the Oscars and Hollywood in a critical era. It advances popular culture scholarship by developing an analytical framework for understanding disparate media texts within an awards season, and it critically updates Oscars' knowledges for modern contexts. Readers interested in media and cultural studies, celebrity studies, persona studies, popular culture, and film will enjoy this book. **Movie Analytics** Dominique Haughton, Mark-David McLaughlin, Kevin Mentzer, Changan

Zhang, 2015-10-05 Movies will never be the same after you learn how to analyze movie data, including key data mining, text mining, and social network analytics concepts. These techniques may then be used in endless other contexts. In the movie application, this topic opens a lively discussion on the current developments in big data from a data science perspective. This book is geared to applied researchers and practitioners and is meant to be practical. The reader will take a hands-on approach, running text mining and social network analyses with software packages covered in the book. These include R, SAS, Knime, Pajek, and Gephi. The nitty-gritty of how to build datasets needed for the various analyses will be discussed as well. This includes how to extract suitable Twitter data and create a co-starring network from the IMDB database, given memory constraints. The authors also guide the reader through an analysis of movie attendance data via a realistic dataset from France. *Practice with Purpose: Standards-Based Comprehension Strategies & Skills Grade 5 (Binder with Transparencies)*
