## Nice Legs Flickriver:

**Building Flickr Applications with PHP** Andrew Morton, Rob Kunkle, 2007-02-01 This is the first book that shows how to take advantage of both your photos and Flickr's enormous cache to create new and compelling extensions to the Flickr platform. You'll discover how to take advantage of open source tools like PHP, Apache, and MySQL and the Flickr architecture to manage, retrieve, and format photos in imaginative ways. You'll also learn how to build upon Flickr's photo collaboration features to create interfaces for working with others on photo album projects. And you will learn how to take advantage of RSS to distribute photo updates with ease.

**Pro Web 2.0 Mashups** Raymond Yee, 2008-04-25 How many times have you seen a web site and said This would be exactly what I wanted if only. If only you could combine the statistics here with data from your company's earnings projections. If only you could take the addresses for those restaurants and plot them on one map. How often have you entered the date of a concert into your calendar with a single click instead of retyping? How often do you wish that you could make all the different parts of your digital world your e-mail, your word processor documents, your photos, your search results, your maps, your presentations work together more seamlessly? After all, it's all digital and malleable information. Shouldn't it all just fit together? In fact, below the surface, all the data, web sites, and applications you use could fit together. This book teaches you how to forge those latent connections to make the Web your own by remixing information to create your own mashups. A mashup, in the words of the Wikipedia, is a web site or web application that seamlessly combines content from more than one source into an integrated experience. Learning how to draw content from the Web together into new integrated interfaces and applications, whether for yourself or for other others, is the central concern of this book.

Year on year records are smashed, equipment gets more sophisticated, facilities improve almost beyond recognition. These changes are impacting on all areas of sport from shoes to cycles and stadia. Is this making sport more exciting for participants and spectators? Or are talent and determination becoming secondary to money and technology, devaluing honest competition? In **Higher, Further, Faster** Stewart Ross looks at these questions and much more. Starting with a description of technology's impact on elements common to various sports such as bats, balls, pitches and special clothing, he then examines the controversies that arise almost daily from golf club technology to the use of Hawk eye in tennis. He also looks ahead to the techno future of major sports such as football, tennis, golf, cricket, cycling and motor sport, and asks where they are going. Are referees and umpires becoming redundant? If drugs will always win, do we really have a choice about using them? Will we ever see a Super Human Olympics? Is modern professional sport more about technology than talent? Can athletes from the developing world ever hope to compete in
