Niels Henrik Abel And His Times:

NIELS HENRIK ABEL and his Times Arild Stubhaug,2000-04-26 Everyone with an interest in the history of mathematics and science will enjoy reading this book on one of the most famous mathematicians of the 19th century The author who is both a historian and a mathematician has written the definitive biography of Niels Henrik Abel [Duel at Dawn](#) Amir Alexander,2011-10-15 In the fog of a Paris dawn in 1832 variste Galois the 20 year old founder of modern algebra was shot and killed in a duel That gunshot suggests Amir Alexander marked the end of one era in mathematics and the beginning of another Arguing that not even the purest mathematics can be separated from its cultural background Alexander shows how popular stories about mathematicians are really morality tales about their craft as it relates to the world In the eighteenth century Alexander says mathematicians were idealized as child like eternally curious and uniquely suited to reveal the hidden harmonies of the world But in the nineteenth century brilliant mathematicians like Galois became Romantic heroes like poets artists and musicians The ideal mathematician was now an alienated loner driven to despondency by an uncomprehending world A field that had been focused on the natural world now sought to create its own reality Higher mathematics became a world unto itself pure and governed solely by the laws of reason In this strikingly original book that takes us from Paris to St Petersburg Norway to Transylvania Alexander introduces us to national heroes and outcasts innocents swindlers and martyrs all uncommonly gifted creators of modern mathematics [The Mathematician Sophus Lie](#) Arild Stubhaug,2001-12-04

Sophus Lie 1842 1899 is one of Norways greatest scientific talents His mathematical works have made him famous around the world no less than Niels Henrik Abel The terms Lie groups and Lie algebra are part of the standard mathematical vocabulary In his comprehensive biography the author Arild Stubhaug introduces us to both the person Sophus Lie and his time We follow him through childhood at the vicarage in Nordfjordeid his youthful years in Moss education in Christiania travels in Europe and learn about his contacts with the leading mathematicians of his time [Math Makers: The Lives and Works of 50 Famous Mathematicians](#) Alfred S. Posamentier,Christian Spreitzer,2024-11-20 Discover the captivating stories behind the greatest minds in mathematics Mathematics today is the fruit of centuries of brilliant insights by men and women whose personalities and life experiences were often as extraordinary as their mathematical achievements This entertaining history of mathematics chronicles those achievements through 50 short biographies that bring these great thinkers to life while making their contributions understandable to the masses Among the fascinating characters profiled are Isaac Newton 1642 1727 the founder of classical physics and infinitesimal calculus he frequently quarrelled with fellow scientists and was obsessed with alchemy and arcane Bible interpretation Sophie Germain 1776 1831 who studied secretly at the cole Polytechnique in Paris using the name of a previously enrolled male student she is remembered for her work on Fermat s Last Theorem and on elasticity theory and Srinivasa Ramanujan 1887 1920 who came from humble origins in India and had almost no formal training yet made substantial contributions to mathematical analysis number theory infinite series and

continued fractions The unusual behavior and life circumstances of these and many other intriguing personalities make for fascinating reading and a highly enjoyable introduction to mathematics **Abel's Proof** Peter Pesic,2004-02-27 The intellectual and human story of a mathematical proof that transformed our ideas about mathematics In 1824 a young Norwegian named Niels Henrik Abel proved conclusively that algebraic equations of the fifth order are not solvable in radicals In this book Peter Pesic shows what an important event this was in the history of thought He also presents it as a remarkable human story Abel was twenty one when he self published his proof and he died five years later poor and depressed just before the proof started to receive wide acclaim Abel's attempts to reach out to the mathematical elite of the day had been spurned and he was unable to find a position that would allow him to work in peace and marry his fianc But Pesic's story begins long before Abel and continues to the present day for Abel's proof changed how we think about mathematics and its relation to the real world Starting with the Greeks who invented the idea of mathematical proof Pesic shows how mathematics found its sources in the real world the shapes of things the accounting needs of merchants and then reached beyond those sources toward something more universal The Pythagoreans attempts to deal with irrational numbers foreshadowed the slow emergence of abstract mathematics Pesic focuses on the contested development of algebra which even Newton resisted and the gradual acceptance of the usefulness and perhaps even beauty of abstractions that seem to invoke realities with dimensions outside human experience Pesic tells this story as a history of ideas with mathematical details incorporated in boxes The book also includes a new annotated translation of Abel's original proof New Dictionary of Scientific Biography Noretta Koertge,2008 Also available online as part of the Gale Virtual Reference Library under the title Complete dictionary of scientific biography **The Norseman** ,2003 **Octogon Mathematical Magazine** ,2007

Mathematical Reviews ,2005 The History of Mathematics Roger Cooke,2005-04-28 Written by one of the foremost experts in the field The History of Mathematics A Brief Course is substantially revised in the second edition This acclaimed text now reorganized topically rather than geographically begins with first applications of counting and numbers in the ancient world and continues with discussions of geometry algebra analysis probability logic and more Discussions of women in the history of mathematics make this a very thorough inclusive resource Midwest *Pioneers in Mathematics* Michael John Bradley,2006 *Themes in Education* ,2002 **A History of Elementary Mathematics** Florian Cajori,1896

Proceedings of the London Mathematical Society ,1882 **An Elementary Treatise on the Theory of Equations** Samuel Marx Barton,1899 **Johnson's New Universal Cyclopædia: A-E** ,1878 *The Century Cyclopædia of Names* Benjamin Eli Smith,1894 **The Century Cyclopædia of Names** ,1899 **The Century-Cyclopædia of Names** Smith,1894 *Johnson's New Universal Cyclopædia : a Scientific and Popular Treasury of Useful Knowledge* Frederick Augustus Porter Barnard,1876

Embark on a transformative journey with Written by is captivating work, Discover the Magic in **Niels Henrik Abel And His Times** . This enlightening ebook, available for download in a convenient PDF format , invites you to explore a world of boundless knowledge. Unleash your intellectual curiosity and discover the power of words as you dive into this riveting creation. Download now and elevate your reading experience to new heights .
