Hapgood, 1999-12 The Acambaro collection comprises hundreds of clay figurines that are apparently thousands of years old

however they depict such bizarre animals and scenes that most archaeologists dismiss them as an elaborate hoax The collection shows humans interacting with dinosaurs and various other monsters such as horned men Both Hapgood and Earl Stanley Gardner were convinced that the figurines from Acambaro were authentic ancient artifacts that indicated that men and dinosaurs had cohabited together in the recent past and that dinosaurs had not become extinct many millions of years ago as commonly thought David Hatcher Childress writes a lengthy introduction concerning Acambaro the latest testing and other evidence of living dinosaurs

**The Free American!** ,2001      The Coming Energy Revolution Jeane Manning,1996

There is a new and exciting revolution coming It will dramatically change our landscape our environment our economy and our lives It will provide each and every one of us with a truly unique sense of independence It will mark the end of oil influenced politics and the beginning of a bright new millennium a time in which we all will have our own unlimited sources of nonpolluting energy However it will not come without a struggle as history has already shown The Coming Energy Revolution provides us with an intriguing and insightful look at the forces behind the free energy movement The Coming Energy Revolution introduces us to some of the inventors both past and present who have insisted that we are surrounded by a sea of energy that we can tap once we have learned nature s secrets Conventional science says that space is cold and still and that what energy does exist cannot be put to useful work The new energy innovators say that conventional science is wrong and that new energy research is being suppressed by a combination of scientific inertia and corporate self interest But the suppression cannot last as this book shows there are simply too many inventors who are close to new energy breakthroughs The Coming Energy Revolution examines the technologies on which these inventors are working There are magnets that can redirect the energy of space There is a gentler form of nuclear energy that can take place on a table top There is hydrogen a clean abundant fuel that can be produced wherever needed There is a form of hydropower that does not rely on massive dams And there are other forms of new energy The Coming Energy Revolution looks at them all and at the kinds of changes that will be needed to overcome the roadblocks between our old energy present and our new energy future

*The World's 20 Greatest Unsolved Problems* John R. Vacca,2005

When Phebe Hedges a woman in East Hampton New York walked into the sea in 1806 she made visible the historical experience of a family affected by the dreaded disorder of movement mind and mood her neighbors called St Vitus s dance Doctors later spoke of Huntington s chorea and today it is known as Huntington s disease This book is the first history of Huntington s in America Starting with the life of Phebe Hedges Alice Wexler uses Huntington s as a lens to explore the changing meanings of heredity disability stigma and medical knowledge among ordinary people as well as scientists and physicians She addresses these themes through three overlapping stories the lives of a nineteenth century family once said to belong to the disease the emergence of Huntington s chorea as a clinical entity and the early twentieth century transformation of this disorder into a cautionary eugenics tale In our own era of expanding genetic technologies this history offers insights into the social contexts of medical and scientific

knowledge as well as the legacy of eugenics in shaping both the knowledge and the lived experience of this disease
