

CAMERA CONTROLS

MANUAL CONTROLS ON YOUR NIKON

Use these buttons, displays and dials when you switch to M mode

1: M mode

On most Nikon D-SLRs you'll find three semi-transparent mode dials (one for 'professional' models); you press the Mode button and turn the rear dial to swap between modes.

2: Rear (main) command dial

You turn this to change the shutter speed. This is displayed on the top LCD panel (or your SLR has one) or the LCD on the rear.

3: Front (sub) command dial

(On cameras with two command dials/D300 and up) you use the front dial to change the lens aperture setting.

4: EV compensation button

On D3000- and D5200-series cameras, you hold down this button while turning the rear dial to change the lens aperture.

5: Exposure settings

The info display on the rear LCD shows you what your current shutter speed, lens aperture and ISO settings are.

6: Exposure indicator

This helps you set the exposure using readings from the camera's built-in meter. The position on the display tells you just how close you are to this reading.

ON THE BUTTON

HOW TO USE THE EXPOSURE INDICATOR

Even when you're in manual mode, your Nikon D-SLR will still measure the light for you

01 Switch to manual

On this D5200 and other 'consumer' Nikons, the manual setting is on the main mode dial. On pro SLRs from the D300s up, press and hold the 'Mode' button and turn the rear command dial.

02 Set a shutter speed

You're now in charge of the exposure settings! Turn the rear command dial and pick a shutter speed suitable for the conditions. For outdoor shots, 1/125 sec is a good starting point.

03 Adjust the aperture

Now adjust the lens aperture to get the correct exposure. On cameras with two command dials, use the front dial. On those with one, hold the EV compensation button down and turn the rear dial.

04 Interpret and adjust

Now watch the exposure indicator on the LCD. Your aim is to centre the exposure at the 'zero' point, but remember that this is just a recommended exposure – you can interpret and adjust it.
