Hitler's Suppressed and Still-Secret Weapons, Science and Technology Henry Stevens, 2007-08 What spooked the Allies in the closing months of the war? Why they were in such a panic to win quickly? Because they knew the Nazis were developing supermetals, electric guns, lasers, and ray weapons. Here are official, previously suppressed reports of cold bombs, the red mercury bomb, oxygen bombs, fuel air bombs, atomic bombs, and rumors of the mysterious molecular bomb. The SS black alchemists delivered large mystery rockets with technology far beyond the V 2. They also invented the computer, magnetic tape, and computer programs refined crude oil using sound waves or produced gasoline for 11 cents per gallon as well as the synthetic penicillin substitute 3065. Includes German experiments in time sustained fusion reactions, zero point energy, and travel in deep space.

**Years of Canada** Ursula Lehmkuhl, Elisabeth Tutschek, 2020 On July 1 2017 Canada celebrated the 150th anniversary of Confederation. The nation wide festivities prompted ambiguous reactions and contradictory responses since they officially proclaimed to celebrate what it means to be Canadian. Drawing on the analytical perspectives of Diversity Studies, this fifth volume of the Diversity Diversit Diversit series explores the repercussions of Canada 150's focus on identity. The contributions touch upon issues of Canada's French and English dualism of its settler colonial past and present and the role of Indigenous Peoples in Canada's identity narrative. Canada's religious, cultural, ethnic, and racial diversity and the challenge of forging a Canadian identity. The authors analyze these and other problems arising from the tensions between identity and diversity by empirically addressing topics such as multicultural memories, Canadian literary and political discourses, M tis history, Canada's Indigenous peoples, Canada's official federal discourse on language and culture, and Canada's evolving citizenship regimes.
