2012 Grants

Compiling - Windows

The officially supported Windows build platform for OpenCPN 2.6 beta and later is Microsoft Visual C++ 2010 Express. It is still possible to perform the build with Visual Studio 2008, but if you want to create installation packages, expect versioning problems. Before you begin, update your Windows. If still using XP, Service Pack 3 is needed.

Important note before you start

The order of the steps described below really matters. Don't skip any steps not explicitly marked as optional and don't change their order unless you really know what you are doing. It's an excellent idea to read the whole text first and make sure you understand what it's talking about, especially if you are new to software development. If you encounter any problems, please get to us in the forum and tell us where you are failing so we can help you and improve these instructions for the others.

*Preparing the toolchain***VC++ 2010 Express**

Get it <http://www.microsoft.com/visualstudio/en-us/products/2010-editions/visual...>

Run the setup and click through the installation wizard. Silverlight and SQL Server are not needed for OpenCPN, so you can save some time and space by not installing them.

After installation, register it (Help->Register Product), otherwise you will have just 30 days to use it.

If you are on XP or Vista, you can supposedly make VS 2010 run faster: <http://news.softpedia.com/news/Speed-Up-Visual-Studio-2010-on-XP-SP3-and-Vista-SP2-152520.shtml>

Service Pack 1

It is essential to perform ALL the updates you can, as if you don't install the Visual Studio 2010 Service Pack 1, you will not be able to convert the WX projects to VS 2010 format. Go to **Help** menu and select **Check for Updates**. It may be necessary to repeat this step.

VC++ 2008 Express Edition

If you don't intend to debug the WX sources, **you can skip this step** altogether. If you do, you can still try to skip this step now and get back to it later in case you experience problems converting the WX projects to the VS2010 format.

Get it from <http://www.microsoft.com/visualstudio/en-us/products/2008-editions/express>

Run the setup and click through the installation wizard. Silverlight and SQL Server are not needed for OpenCPN, so you can save some time and space by not installing them.

Git for Windows

Get it from <http://msysgit.github.com/> (You want Git for Windows, Not MSysGit)

The defaults for all the installation settings are fine except the following:

- On the „Adjusting your PATH environment“, select „Run Git from the Windows Command Prompt“
- On the „Choosing OR/LF behavior“ select „Commit line endings as they are“

If you want a tutorial, have a look at the series of articles starting at http://www.lostechies.com/blogs/jason_mendth/archive/2009/06/03/git-for...

Cmake

Get it from <http://cmake.org/cmake/resources/software.html>

While installing it's advisable to let the setup program add cmake to the system PATH variable.

Gettext

Install Poedit from <http://www.poedit.net/> - it's version of gettext is the best available out there.

Add gettext to your PATH - if you installed Poedit, right-click **My Computer**, select **Properties...** and on the **Advanced** tab click on **Environment Variables** button and add `C:\Program Files\Poedit\bin` to the **PATH** system variable.

NSIS (Unicode)

Needed **only** in case you intend to build the **installation package** for OpenCPN. Not needed for normal development.

Get it from <http://code.google.com/p/nsis/downloads/list>

The NSIS Unicode 2.46 setup file is also included in the GIT repository -> `..\buildwin\NSIS_Unicode\nsis-2.46-Unicode-setup.exe`

Direct download link: <http://code.google.com/p/nsis/downloads/detail?name=nsis-2.46.3-Unicode...>

Download and install it. Due to a "bug" in CMake, which only looks at "HKEY_LOCAL_MACHINE\SOFTWARE\NSIS" for the installation location of NSIS and the Unicode version adds its registry key in "HKEY_LOCAL_MACHINE\SOFTWARE\NSIS\Unicode", there is some registry tweaking needed.

Open Cpn User Manual
